Elevator Pitch

Come visit Cloud Town, where the magic of relaxation, recovery, and accessibility come together to create a haven for all. Embrace the enchantment, unwind in serenity, and rediscover the joy of inclusive experiences in a theme park land like no other.

Mission Statement & Core Values

We are dedicated to fostering an atmosphere of relaxation and recovery, offering respite from the strain of the rest of the theme park. We believe that everyone, regardless of ability, deserves the opportunity to enjoy the magic of a theme park, and we are committed to ensuring accessibility for all.

Cloud Town is not just a theme park; it's a retreat for rejuvenation. Our land features serene walkways, calming water features, and quiet corners where visitors can unwind and reconnect. Play is a universal language, and in Cloud Town, we believe in the healing power of laughter and joy. Our attractions are designed to provide a sense of wonder without overwhelming sensory experiences, offering a therapeutic escape for those in need of respite.

Accessibility

We take pride in our commitment to accessibility. Cloud Town is designed with careful consideration for individuals of all abilities, ensuring that everyone can explore and engage in the wonders of our land. From thoughtfully designed pathways to inclusive attraction experiences, we aim to make every aspect of our land accessible and enjoyable.

Inclusivity

Our attractions are curated to cater to a diverse audience. From sensory-friendly activities to an inclusive ride, we ensure that everyone can participate and find joy in the enchanting moments we create.

Empathy

We prioritize empathy and understanding in every interaction. Our staff is trained to assist and accommodate the unique needs of our Guests, ensuring that each person feels welcomed, valued, and understood.

Branding Guidelines One Sheet

BRAND NAME

Cloud Town

CONCEPT

An inclusive, accessible, inspirational theme park land focused on relaxation and recovery.

ATTRACTIONS

Quiet rooms, sensory areas, people mover, interactive walking trails, QSR restaurant, play area, retail store

USP

A break from crowds in a relaxing and fun atmosphere. A space that is mindfully created with guests who are sensitive to sensory overload in mind. A space that is accessible for all.

BRAND STORY

Cloud Town is a community that exists in no specific time or place. It's residents, called Dream Weavers, traverse the universe in hot air balloons to procure objects, collect stories, and gather inspiration.

Each person, animal, and creature has their own cloud in the sky - this is where their individual dreams are stored. Today, there are more dreamers and visionaries than ever! While this is a good problem to have, the Dream Weavers now find it difficult to keep close tabs on all of their constituents. Because of this, the town is recruiting new members of their team, including part-time and seasonal positions as well! Visitors to Cloud Town are encouraged to explore the community and learn about this very important profession.

Nomenclature List
11/5/2023
Charlie Suhling

“Exordia Park” - Town Square area at the front of the land.

“**Exordia”** - Cloud Town’s first Dream Weaver.

“Hospitality Hall” - Welcome Center located in the City Hall building at the land’s entrance.

“Cloud Town Trek” - C-Ticket Peoplemover Attraction; provides a tour of the town.

“Avery” - Cloud Town Trek narrator.

“Trekside Treats” - Outdoor food market under the Trek track, offering quick bites.

“The Inspiration Vault” - Merchandise location set in the town bank.

“Pilot’s Post House” - Package pick-up/drop off location and children’s activity center.

“The Pilot” - A dream weaver who dreams of becoming a pilot while also following the family business of postal delivery.

“Folio’s Quiet Kitty Café” - Quick Service Restaurant within Cloud Town.

“Folio’s Book Shop” - Next to the café, this shop sells books and offers a cozy environment to read and relax.

“Folio” - The dream weaver who was responsible for maintaining the dream clouds of the felines of the world.

“Discovery Dreamlanding” - Large show building at the back of the land, home to walking trails.

“Cirque Cloudia” - Walking discovery trail within Discovery Dreamlanding.

“Enchanted Forest” - Walking discovery trail within Discovery Dreamlanding.

“Mermaid Lagoon” - Walking discovery trail within Discovery Dreamlanding.

“**Captain Breezy Beard”** - The legendary pirate of Mermaid Lagoon.

“Zephyr” - The loyal Dream Weaver whose mission is to restore the lost dreams to their rightful owners.

“The Mermaid Guardian” - The mermaid that greets guests in Mermaid Lagoon.

“Star Tree Academy” - Schoolhouse area for younger guests to play and explore.

“The Garden of Imagination” - Play area within Star Tree Academy.

“Cloud Town Clubhouse” - Located at the entry to the neighborhood.

“Dreamscape Estates” - Neighborhood in Cloud Town.

Street Names

“Exordia Esplanade” - Street name - main thoroughfare through Cloud Town.

“Inspiration Alley”

“Dreamlanding Lane”

“Cloudy Court”

“Imagination Avenue”

“Daydream Drive”

“Star Tree Trail”

“Trekside Terrace”

“Balloon Boulevard”

Concept Statement

Cloud Town – An inclusive, accessible, inspirational theme park land focused on relaxation and recovery.

Backstory

Cloud Town is a community that exists in no specific time or place. Its residents, called Dream Weavers, traverse the universe in hot air balloons to procure objects, collect stories, and gather inspiration, many of which have been lost by dreamers. This town serves as a repository of “all things good”. These provisions are shared among the community and taken along on journeys as the Dream Weavers build the dreams of people all over the universe. Each person, animal, and creature has their own cloud in the sky - this is where their individual dreams are stored. These clouds hold all the inspiration for each individual being, so that they can construct their own dreams while they sleep. The Dream Weavers have one goal: to inspire dreamers of all ages to dream of a brighter, happier, future.

When a dreamer is truly inspired and completely focused, their cloud can take the shape of the object or concept they are envisioning. This is why clouds in the sky often depict recognizable figures and shapes. Traditionally, there has been a small group of individuals that create powerful dreams while they are awake - these people are referred to as visionaries and their dreams are impactful and inspirational. Their clouds require extra care and attention by the Dream Weavers, including the need for thoughts, lessons, and stories of inspiration, courage, and creativity.

Today, there are more dreamers and visionaries than ever! While this is a good problem to have, the Dream Weavers now find it difficult to keep close tabs on all of their constituents. Because of this, the town is recruiting new members of their team, including part-time and seasonal positions as well! Visitors to Cloud Town are encouraged to explore the community and learn about this very important profession. If there are not enough Dream Weavers, the clouds become at risk of takeover by residents of Shadow Town, who aim to fill the clouds with terror, to cause nightmares and do irreparable harm.

Arrival & Exordia Park:

As Guests proceed to the entrance of the land, an arched cobblestone bridge serves as the passageway into Cloud Town. A large fabric banner hangs from the bridge reading “WELCOME TO CLOUD TOWN”. Passing through the archway under the bridge, a grand fountain can be seen in the central hub at the front of the land. The fountain is made of a large cast stone basin with bronze accents. A thick cloud of mist flows from the center of the fountain where a large bronze statue of a hot air balloon appears to be floating among the clouds. The hot air balloon itself is made of many individual patches that depict objects collected from the first ever Dream Weaver, Exordia. A plaque in front of the fountain reads:

+++++

Dedicated to dreamers of long ago, today, and always.

To commemorate Cloud Town's first Dream Weaver, Exordia, and to honor the first flight among the clouds. Exordia's boundless imagination and passion for dream building continue to embolden a brighter future for all, forever.

"Even the smallest of dreams require a little inspiration to get off the ground."

+++++

Exordia Park is the central hub of Downtown Cloud Town, home to Hospitality Hall, Cloud Town Trek, and retail, dining, and entertainment options.

Hospitality Hall - Cloud Town Welcome Center

Located in City Hall, this is the first stop for Guests to learn about the accessible and inclusive land within. Guest Relations Cast Members act as "Cloud Town Ambassadors" and assist with anything and everything.

The interior is painted a bright ivory color with light purple, sky blue and gold filigree hand painted throughout. A whimsical take on a neoclassical style, six oblong/cartoony shaped Roman/Tuscan columns are placed in a circular layout around the center of the room. A scale model of the land and a Braille map are presented within, and a Guest Relations Counter is at the rear of the Hall. Signage on the wall explains the graphics seen throughout the land, including a sensory scale for all experiences. The second level of the Hall is inaccessible to guests but holds all the fun items that are left over from previous trips into the clouds. Additional objects are spread throughout the first floor and decorate the shelves, walls, and any other open areas. Portraits adorn the walls and depict stories of the early Dream Weavers.

Cloud Town Trek - C-Ticket Peoplemover Attraction:

Curious visitors board their very own cloud vehicle and traverse through the quaint community to experience all there is to do and see. Elevated above the town and narrated by Brawner, the trek engineer, this tour provides Guests with the history, traditions, and future plans for Cloud Town.

Since inclusivity, accessibility, and inspiration are the tenets of the town, many features have been included to ensure that all Guests can participate. Wheelchairs can be installed directly into the cloud vehicle for a smooth ride – no need to transfer!

Trekside Treats - Outdoor Food Market

Located under the elevated trek tracks, this outdoor market serves freshly prepared grab-and-go items with a variety of delicious desserts and healthy options. A community co-op with diverse offerings to appeal to varying diets, the residents of Cloud Town love sharing their unique spin on traditional American fare with all who come to visit.

The Inspiration Vault - Retail Store

Located in the town bank, Guests commemorate their journey to Cloud Town by shopping among the Dream Weaver's collection of feel-good finds. Dark wood-stained bank teller desks with green banker lamps act as check-out counters. Passing through a large bank vault, marble floors and metal walls are covered with shelves of fun toys and gifts that create boundless amounts of dream inspiration and creativity.

Pilot's Post House - Package Pick-Up and Drop-Off/Children's Activity Center

An arched Quonset hut reminiscent of an airplane hangar is adorned with signage and graphics that depict mail delivery. A post office collection box is placed outside with hand painted lettering. Inside the hangar, the arched ceiling stretches the length of the space. Located next to The Inspiration Vault, the two spaces connect to allow for package drop-off upon purchase. The rear of the building contains a small stage and open floor for a story time entertainment act.

Dream-sharing sessions are led every hour by The Pilot. The Pilot is a storytelling Entertainment Cast Member who leads multiple shows throughout the day. This character explains that while their childhood dream was to become a pilot, they always felt like they needed to follow in the family business of postal delivery. The Pilot is a wise and quirky character who was a young child when Exordia ventured into the clouds for the very first time.

Upon Exordia's return, The Pilot realized the opportunity to combine their family business and their calling - inter cloud-system postal delivery! Now, all the Dream Weaver colonies throughout the universe could communicate and share resources. Following the story sharing session, The Pilot invites Guests to write a letter to their very own Dream Weaver. Upon sealing the letter, The Pilot places a pair of wings on each envelope. The pilot puts on their goggles, collects the letters, and proceeds through a backstage door. The media windows show a hot air balloon pass by with The Pilot on board, letters in hand, waving at the Guests as they fly away.

Folio's Quiet Kitty Café

Prior to his retirement, Folio was the Dream Weaver responsible for maintaining the dream clouds of the felines of the world. He discovered that they shared his passions of sleeping, storytelling, and snacking. Now retired, Folio lives a very relaxed life and manages his shop where Dream Weavers and visitors alike can relax and explore his book collection, grab a quick meal, and watch his kittens dream of their next big adventure. Visitors of Cloud Town are encouraged to purchase a book for their travel home.

Kittens (limited figure animation) sleep among the tall bookshelves. Tables and chairs fill the lower level of the shop as bookshelves line the walls. A dome ceiling with stained-glass mosaic tiles depicts sleeping cats. Portraits on the walls depict cats in dream-like situations as if Guests are looking into their dream clouds.

A separate dining room depicts contents from the kitty dream clouds where objects are scattered throughout including mountains of yarn balls, toy mice and fish, and large scratching posts.

Folio’s Book Shop

Branching off the café, this separate section contains books for purchase and a limited menu of coffee and tea. The front of the store is open to both levels and shows massive floor-to-ceiling bookshelves with a balcony overhead. Sleeping kittens are dreaming among the books, tails wagging overhead. A curved staircase leads to the second level of the shop, which is intended for adults, featuring individual desks for personal work. The ceiling mural matches the hand painted style seen throughout the town and depicts the different dreams of kittens.

Discovery Dreamlanding

The Dream Weavers have pulled a few dream clouds to the ground for all to experience and explore. For the very first time, visitors of Cloud Town can get a glimpse into what it’s like to be a Dream Weaver. Guests are invited to step into the dream clouds and explore three different dreams through interactive walking trails filled with storytelling, excitement, and wonder.

Large white clouds appear to be held down by thick ropes, tied to large wooden posts in the ground. Pink bows decorate the ropes. A wooden bridge connects Cloud Town to the visiting dream clouds and serves as the passageway for Guests to enter the dreams.

Cirque Claudia

Under a colossal, cloud-kissed circus tent, in one of the many dreams of Cloud Town, lies the whimsical world of Cirque Cloudia. Here, the dreams of both young and old come to life, and the sky itself seems to laugh along. Visitors are greeted by friendly faces and are met with the melodic strains of lively circus music as they enter. The Carousel of Whimsy invites passengers to choose from a variety of animals with all kinds of textures. The Cirque Spectacular transpires throughout the day, showcasing acrobats, jugglers, and clowns in sensory-friendly performances that showcase relaxation and teach valuable skills, such as breathing exercises. As "Cotton Candy Clouds" tempt with cloud-shaped sweets, cloud-themed games and puppet shows offer infinite entertainment. Cirque Cloudia is where dreams take center stage, the extraordinary becomes the norm, and hilarity and awe fill the sky with happiness.

Enchanted Forest

Long ago, nestled within the heart of Dream Land, there existed a hidden world known as the Enchanted Forest. Its story was told in hushed tones and whispered tales, for this forest held secrets that were shared only with those who believed in the extraordinary. The Enchanted Forest was no ordinary woods. It was a place where the very laws of nature danced to the whims of imagination. Trees grew tall and ancient, their branches adorned with leaves that shimmered like gemstones in the dappled sunlight. Some leaves were so large that they served as canopies, creating natural shelters where

visitors could take refuge from the enchanting rain that drizzled above. The plants themselves seemed to have personalities. Vines playfully reached out to tickle the ankles of those who passed by, while sentient flowers would nod their colorful heads in greeting. It was said that if you whispered a secret to one of these floral confidants, it would carry your wish on the wind, ensuring it reached the ears of someone special. As visitors wandered deeper into the forest, they'd come across whimsical creatures of all shapes and sizes. Spritely fairies flitted about, leaving trails of sparkling dust in their wake. Talking animals held court under the ancient trees, ready to engage in conversations filled with wisdom and humor. The forest was a place where dreams manifested as living, breathing creatures.

Visitors enter this enchanting realm through a tree-lined path covered in soft, mossy ground. As they walk deeper into the forest, the scenery transforms, revealing a whimsical village nestled among towering trees. Colorful mushrooms, sparkling streams, and friendly forest creatures greet them, seamlessly transitioning into this nature-inspired wonderland. They are immersed in the embrace of the forest by the noises of rustling leaves, distant birdsong, and gurgling streams. A floral canopy forms an arching tunnel overhead, enveloping visitors in the enchantment of the forest.

Mermaid Lagoon

Amidst the enchanting lagoon-themed walking trail lies a tale of wonder and adventure, where the legendary Captain Breezy Beard sails the dream-filled seas, aided by his loyal Dream Weaver, Zephyr, in the search for lost dreams scattered across the land. As guests pass through the postcard archway into the sandcastle village, delicate seagrass, vibrant sea flowers, and resilient coastal shrubs dot the landscape, adding bursts of color to the sandy terrain. Seabirds perch atop the sandcastle rooftops, filling the air with their melodious calls. The village is adorned with intricate sandcastles of various shapes and sizes, each displaying unique and elaborate designs. Colorful market stalls line the streets, offering an array of seashell trinkets, handcrafted jewelry, and beach-themed souvenirs. Guests are greeted by the diligent Dream Weaver, Zephyr, who reveals the mission to restore the lost dreams to their rightful owners by finding Dream Tokens around the trail, these Dream Tokens are represented by trinkets scattered throughout the trail. The Dream Weaver explains that the people of this town have forgotten their dreams, and that if we don't give them back to their original owners, those dreams may never come true. These Dream Tokens are represented by clams, pearls, crystals, and feathers. Each guest is bestowed with a celestial sand bucket embellished with charming patterns. Guests are then given their first token by Zephyr who found it nestled within the trail, snuggled amidst the gentle grains of cosmic sand.

A serene grotto, adorned with bioluminescent algae and softly glowing coral, serves as a sanctuary where guests can immerse themselves in the gentle ebb and flow of the lagoon's sparkling tide pools, brimming with an array of iridescent shells, house a vibrant assortment of marine life, including colorful sea anemones, delicate starfish, and playful hermit crabs that scuttle along the rocky shores. An underwater garden, brimming with vibrant seaweed, swaying kelp forests, and exotic seagrass, creates a mesmerizing underwater oasis that pairs with the shimmering mermaid statues carved

into the grotto's walls. The Mermaid Guardian, stationed high atop their rocky perch, greets visitors to the grotto and offers them a second token as they enter. The Guardian then unveils an interactive Dream Altar adorned with shimmering crystals, inviting the guests to place their Dream Tokens that they have collected from their journey onto the altar. The Dream Altar represents a symbolic bridge between the ethereal realm of forgotten dreams and the conscious awakening of their significance within the hearts of the townsfolk. As guests place their Dream Tokens upon the altar, they engage in a soulful dialogue with the essence of their lost aspirations, allowing them to embrace the profound significance of each dream and the transformative power it holds within their lives. As guests gather their tokens and continue along the path, they reach a breathtaking ocean view, where the majestic pirate ship of Captain Breezy Beard, adorned with mystical sails, comes into view.

Nearby, the humble shack house of the spirited Captain Breezy Beard himself, eager to welcome all to his vessel and share tales of bravery and resilience. With the guests' Dream Tokens in tote, Captain Breezy Beard invites them to aboard his ship, regaling them with stories of legendary voyages and the importance of holding onto one's dreams. Before he forgets, though, he has uncovered a unique token for one of our visitors. Inside Captain Breezy Beards Quarters lies a treasure trove, filled with glittering doubloons, shimmering pearls, and ornate chests brimming with sparkling gemstones, capturing the essence of the ship's storied history and its legendary plunder. Guests guide themselves through the ship, where they find a grand Treasure Chest of Restored Dreams rests upon the ship's deck, awaiting the arrival of the Dream Tokens. Guests are encouraged to leave their mark on Cloud Town by carving their names or meaningful aspirations into the Captain’s Inscription Stones, which are smooth, polished stones of varying sizes and vivid colors. As a group, the visitors to Cloud Town can place their Inscription Stones as well as their Dream Tokens into the Captain’s treasure chest and bring back the town's lost dreams and rekindle its charm by rekindling the flame of hope of making dreams come true.

Star Tree Academy

During the school’s annual open house, Guests are invited to play and explore the school grounds. Entering through a large schoolhouse facade, the restrooms and changing rooms provide a location for families to prepare for the fun that is in store. An Ornamental metal fence with hidden star details runs along the outside border of the academy. A one-of-a-kind recess playground and splash pad offers younger Guests the opportunity to play and explore. Stepping further into the schoolyard, a large tree appears with glowing stars emanating from the branches. The namesake of the school, the Star Tree serves as a spot for Guests to make wishes for a brighter future. As each wish is made, a corresponding star begins to glow on the tree.

The Garden of Imagination

In a land where dreams come to life, there exists a mystical garden known as the Garden of Imagination. Legend has it that this garden was born from the dreams of small children, a place where their wildest imaginings could take root and grow. It was a place of perpetual spring, where flowers bloomed in every color of the rainbow, and the

air was filled with the sweet scent of possibilities. The heart of the garden was the Star Tree, an ancient and magical giant tree adorned with enormous, sparkling stars. It was said that if you made a wish and touched one of the stars, your wish would come true in the garden. As visitors enter the Garden of Imagination, they become a part of this enchanting story. They are invited to make a wish, touch the stars, and let their imaginations run wild. As they explore, they'll find that the garden responds to their dreams, with flowers changing color, whimsical sculptures coming to life, and pathways appearing where they wish to wander. The Garden of Imagination is a place where visitors of all ages can rediscover the joy of childlike wonder and creativity. It's a testament to the power of dreams and imagination, reminding us that in this dreamland escape, the possibilities are as endless as the imagination itself.

Cloud Town Clubhouse

Located just outside the bustling downtown community, the Clubhouse sits at the entrance to Dreamscape Estates, the premier neighborhood that houses the Dream Weavers. Guests are welcomed inside the Clubhouse which serves as a community space, ideal for visitors who need to take a rest and relax. If a private room is needed, Guests can meet with a Clubhouse Cast Member to reserve one of the homes in the neighborhood for a safe, quiet, private, and sensory friendly escape. The Clubhouse features a curved roof and a large rainbow/cloud stained-glass window at the front. When the sun shines at just the right angle, the interior of the space is filled with rainbows of light.

Dreamscape Estates

Stepping through the clubhouse, Guests enter the neighborhood of Dreamscape Estates. This neighborhood is filled with the vibrant and quirky homes where the Dream Weavers reside. Each house is bursting with unique personality and unusual features, like curved rooflines, goofy silhouettes, and bright colors. Reserved specifically for one group of guests, each house serves as a dedicated space to relax, cool down, and unwind. Guests can explore the homes to see how the Dream Weavers live, or they can participate in a short meditation exercise, breathing routine, or sensory activity.

CLOUD TOWN INFORMED GUEST FLOW PLAN

Overall Land

Entrance to Cloud Town is included in the regular ticket price of an existing theme park.

Cloud Town is meant to be inclusive and accessible for all, but the main goals of Cloud Town -- low stimulation, relaxation, and escape – can be hindered by the very environment created to achieve them. Capacity and guest flow will play an essential role in maintaining the heart of this accessible environment. Cloud Town will operate at three capacity levels, which will primarily dictate entrance procedures.

With an overall size of approximately 410,000 sqft, the overall capacity of Cloud Town is 4,792 Guests. This number assumes that approximately 48.8% of our land is indoors, with 45 sqft per person, and 51.2% of our land is outdoors, with 135 sqft per person. The back of house space is not accounted for in these capacities or square footages.

We expect approximately 20% below capacity on an average day, making our average daily expected capacity 3,834 Guests.

We will ensure that Cloud Town has at least 96 benches throughout the land (2% of our peak capacity), most of which will be covered or shaded, and a few under misters that can be turned on for hot days. This ensures that Guests who are not indoors still have a replace to rest and relax. There will be a trash can and a recycling bin every 50 feet, so approximately 8,200 throughout the land. Across all restroom locations, there will be at least 60 accessible toilets within Cloud Town.

Open Entrance

When the Cloud Town capacity falls below 3,977 Guests total, the land will operate with Open Entrance. This means that any theme park Guests are free to enter the land and explore with no restraints or wait time.

Limited Entrance

When the Cloud Town capacity goes above 3,977, but is below 4,696, the land will operate with Limited Entrance. Limited Entrance utilizes a virtual queue system, which notifies Guests when it is their turn to return to Cloud Town. When joining the virtual queue, Guests will input their party size and must enter with their entire group, within one hour of being notified. Since entry is based on capacity, Guests will be notified on a party-by-party basis and will only receive an estimate of their return time (which is subject to change until their arrival time is called).

There is, however, one exception to this virtual queue system. Despite operating with Limited Entrance, Guests who qualify for the theme park’s Accessibility Pass will continue being able to access the land without first waiting in a virtual queue for a call-back time. During Limited Entrance, a portion of the capacity will be held on reserve to allow open entry to those with Accessibility Passes.

Closed Entrance

Once the Cloud Town capacity reaches 4,696, the land will move to Closed Entrance. Overall, once this phase is entered, entrance into Cloud Town will be closed, to protect the integrity of the land. When operating under Closed Entrance, entrance to Cloud Town will not reopen until the capacity of the land has reduced to a lower phase.

Unfortunately, during Closed Entrance, even those with Accessibility Passes will not have open access to enter Cloud Town. However, a small portion of the capacity will be reserved for emergency situations. Cloud Town Cast Members will be outside of the entrance to listen to differing circumstances and can make the decision to allow Guests entrance based on the situation.

Accessibility Passes

The Accessibility Pass is our commitment to ensuring an inclusive and enjoyable experience for all our Guests, regardless of their differing accommodation requirements. We understand that everyone should have the opportunity to share in the magic of our theme park, and this pass has been designed to provide convenient and equitable access to our attractions and facilities.

The Accessibility Pass is available throughout the entire theme park for Guests who register with Guest Relations.

Key Features of the Accessibility Pass

- Attraction Return Times: With the Accessibility Pass, Guests who are unable to wait in lines for extended periods of times may receive a return time for the attraction, instead. The return time will be equal to the current wait time of the attraction and allows them priority access to enter the attraction when it is their time. Although the attractions within Cloud Town will not utilize Attraction Return Times, the Accessibility Pass will keep priority entrance open for all holders of Accessibility Passes when in Open Entrance and Limited Entrance phases. Cloud Town will not utilize Attraction Return Times because all attractions will automatically administer return times to all Guests when waits are above 10 minutes.
- Designated Assistance Centers: There are established Assistance Centers located throughout the park, that provide guidance on attractions, accommodations, and any additional assistance needed. Hospitality Hall, the Guest Relations location within Cloud Town, will serve as the main hub of these centers.
- Friends and Family Privileges: The Accessibility Pass allows Guests who qualify to be accompanied by up to five additional Guests. Additional Guests enjoy the same benefits with the Accessibility Passholder, ensuring that everyone can share the experience together.
- Clear Signage and Assistance: Throughout Cloud Town, you will find clear signage indicating accessible routes and services. Staff is also readily available to aid and answer any questions.
- Accessible Seating: In attractions, entertainment venues, and more, accessible seating options are available.

Obtaining an Accessibility Pass

To obtain an Accessibility Pass, Guests may visit Guest Relations upon arrival to the theme park. Guests are invited to visit the overall-park Guest Relations or Hospitality Hall in Cloud Town. Staff will be happy to assist Guests with guidance and all the necessary information needed to make the most of their visit.

At Cloud Town, inclusivity is our priority, and the Accessibility Pass is one of the many steps we have taken to ensure that everyone can enjoy both Cloud Town, and the entire theme park.

Once Guests have added an Accessibility Pass to their park pass, they may use their park app to reserve return times for attractions. Any member of the party can obtain a return time for the whole party, but the registered guest using the Accessibility Pass must be present when the return time is redeemed. Return times do not expire, but a party can only hold one active return time. Guests can also visit Guest Relations or speak with a Cast Member to receive return times when using a mobile device is not possible.

Hospitality Hall

Square footage: 3,720 sqft guest space
Capacity: 83

The Guest Relations counters are here to help Guests with anything they may need. There are 5 counters, allowing a maximum of approximately 40 parties to be helped per hour. When there is high demand in the Hospitality Hall (more than 8 parties in line), Guests will check-in with a Cloud Town Cast Member who will essentially place them in a virtual line. Guests can explore the Hospitality Hall, getting a sense of everything Cloud Town has to offer, or digger deeper into the story; when it is their turn, their name will be called. There is plenty of room in the Hospitality Hall for waiting and relaxing.

Cloud Town Trek

Track length: 2,500 ft
Speed: 5.8 ft/sec
Vehicles: 14 in operation (4 wheelchair-accessible, 10 standard)
Vehicle capacity: 22
Duration: 7 minutes
THRC: 1,734

Queue Procedures

The goal is to keep the queue time for Cloud Town Trek at a maximum wait of 10 minutes. If it is at 10 minutes or less, Guests will be able to wait in the queue area and board the attraction quickly. When the wait time does exceed 10 minutes, the attraction will automatically swap to giving return times, instead. Guests will approach the queue and receive a return time, and then will be called back anywhere from 10 minutes to an hour later to ride. Because the physical line will never be longer than 10 minutes, there is no return time that is automatically given to Accessibility Pass holders, like there is throughout the rest of the theme park. Every guest will either wait the 10-minute queue or every guest will receive a return time. The queue features two elevators and two sets of stairs, so that Guests may use their preferred method to access the elevated track.

Discovery Dreamlanding

Building square footage: 101,503.25 sqft guest space
Trail lengths: 1,200 ft / 1,225 ft / 1,625 ft
Average time on trails: 8 min / 10 min / 12 min
Capacity: 2,255

Due to the free-flowing nature, we do not anticipate the Discovery Dreamlanding frequently hitting capacity limits. If they do, the queue will be a virtual queue that you can join when approaching the building, and you will receive a return time to experience the walking trails. When you receive your return time, you will have the opportunity to experience any, or all, of the trails. Throughout the trails, there will be attendants to monitor and help Guests. There will also be exit points and restrooms, in case of emergencies.

Folio's Quiet Kitty Café

Square footage: 5,119 sqft guest space
Seated capacity: 250
Average turn time: 30 minutes (1-4 top) / 45 minutes (5-8 top) / 60 minutes (9+ top)
Hourly meal capacity: 350
Average daily covers: 2,348

Guests may choose to order via mobile order or in person at a register. Additionally, they may place a sit-down order or an order for takeaway. Although it is a quick service restaurant, there will be a multitude of Cast Members in the dining room to help, to take any stress out of the typical dining experience.

Mobile Order / Takeaway
Guests can place the mobile order from any location. They will start by choosing a takeaway order and will choose the time frame in which they would like for their order to be ready. They will proceed to input their entire order and pay. Once they pay, they will have the option to select when they arrive at the restaurant ("I'm Here"). Once they select that they have arrived, their order will be prepared, and they will be given a window number at which they will pick up their order. The order will be packaged appropriately so that they can carry it out of the restaurant with ease. When placing a takeaway order, there will be options for Guests to include sauces and other items they may need to go along with their order; it will also include utensils and anything else they may need for ease on-the-go.

Mobile Order / Sit-Down
After choosing to place their order via mobile order, Guests can start by choosing sit-down. This will give them a narrower time frame to return than takeaway. When Guests arrive at their return time and are seated at a table, they will give their mobile order number to the Cast Member who is working in the seating area. The Cast Member will assign them to a table and link it to their mobile order. Once the order it ready, it will be automatically delivered to the table. There will be stations with condiments, utensils, etc. throughout the restaurant, but these things will also be included on the tray and there will be Cast Members available to help, as well.

Register Order

If Guests prefer to order in person, they may enter Folio's Quiet Kitty Café and order at one of the registers. They may still select takeaway, in which case they will be given a window number where they can pick up their order. If they choose to sit down, they will be given a table number to sit at. Once the order it ready, it will be automatically delivered to the table. There will be stations with condiments, utensils, etc. throughout the restaurant, but these things will also be included on the tray and there will be Cast Members available to help, as well.

Folio's Book Shop

Square footage: 4,078 sqft guest space
Capacity: 90

After Guests shopping, they can choose mobile checkout or to checkout in person. In-person checkout will operate as traditional retail locations do, but with more accessible counters available.

Mobile Checkout

If Guests choose mobile checkout, they can scan the items into their mobile app and process their payment directly through the app. Once they have completed their payment, they will include a QR code, which will be presented at the mobile checkout counter on the way out. Guests can also find bags at the checkout station for their merchandise.

The Inspiration Vault

Square footage: 7,829 sqft guest space
Capacity: 174

The checkout procedures will mimic those described above for the book shop.

Pilot's Post House

Square footage: 2,948 sqft guest space
Capacity: 66

This entertainment offering will have free-flowing and organic audiences. Audiences can stay for any length of time and are able to interact with this entertainment as much, or as little, as they would like.

Cloud Town Clubhouse

Square footage: 5,120 sqft guest space
Capacity: 113

A clubhouse is a building in a housing community that is specially dedicated to group activities. The main purpose of the clubhouse will be to have sensory rooms and other activities geared towards the needs of different individuals who may not need the full solitary function of the houses. The capacity of individual rooms will be marked clearly outside of each room and there will be Cast Members to monitor the rooms.

Dreamscape Estates

Square footage: 650 sqft guest space per house

Capacity: one traveling party per house, maximum of 14 people

When Guests would like to utilize the houses, they will go to the Cloud Town Clubhouse and check-in for one. If there is not a house readily available for them, they will be added to a virtual queue. Either at check-in or when receiving their return message, Guests will receive a 4-digit code to use on the keypad of their assigned house, that will give them access at any point within their 15-minute window. There will be a new code for each house, every 15 minutes. While Guests are in the houses, they will see reminders that they are under active surveillance, and there will be roaming attendants outside of the houses to address any needs. The attendants will also be able to help extend the time of house-access when absolutely needed and will do a quick sanitization process whenever a house clears.

Star Tree Academy

Square footage: 3,675 sqft guest space
Capacity: 82

There will be no specific procedures for this area, but there will be attendants during more busy times to help organize the crowds trying to utilize this area.

The Garden of Imagination (Star Tree Academy Play Area)

Square footage: 7,350 sqft guest space
Capacity: 54

The play area is a safe space with a plethora of activities and features that will keep kids entertained and active. Because it is a large, outdoor area, and the different areas will be consistently swaying in terms of capacity levels, there will be no need to monitor. Some Guests may stay here for hours, and some may only pass through.

Timing Sheet for Three Key Demographics

We explored the average experience lengths for each key offerings, and then mapped out the average timed experience of three different types of Guests.

Group 1 is a family of four on vacation consisting of two adults, one 7 year old child with ASD, and one 4 year old child. This family uses the Accessibility Pass in the Theme Park, but does not need it for Cloud Town since the Attractions are automatically virtual queue once a wait time exceeds ten minutes. This family is able to gain priority access to the land if capacity is close to being reached due to having Accessibility Pass.

Group 2 Is two adults in their 20s: one adult has Generalized Anxiety Disorder and does not usually go to theme park and the other adult is a frequent park goer who is traveling with their friend. It is both of their first times in Cloud Town. Before visiting Cloud Town, the friends spent their morning in the rest of the theme park and are arriving to Cloud Town at 2pm

Group 3 is two Adults in their 40s and 50s: one is a veteran in a wheelchair who has PTSD, and the other is their partner. This is an SOS situation where the veteran's PTSD is triggered, and they need a space to calm and center themselves. These adults are not local, but come frequently to the parks. They arrive to Cloud Town around 4pm after the SOS situation has occurred.

Average Experience Lengths

TIMING SHEET

Date:	5-Nov-23
Revision:	5

Exordia Park Fountain	10 minutes
Hospitality Hall	15-20 minutes
Discovery Dreamlanding	11-15 minutes
Star Tree Academy	45 -90 minutes
Cloud Town Clubhouse	45 minutes
Dreamscape Estates	15 minutes
Pilot's Post House	15-20 minutes
The Inspiration Vault	30-45 minutes
Folio's Book Shop	20-30 minutes
Folio's Quiet Kitty Café	45 - 90 minutes
Cloud Town Trek	19 (non-wheelchair) - 24 (wheelchair)
Trekside Treats	15 minutes

Demographic 1

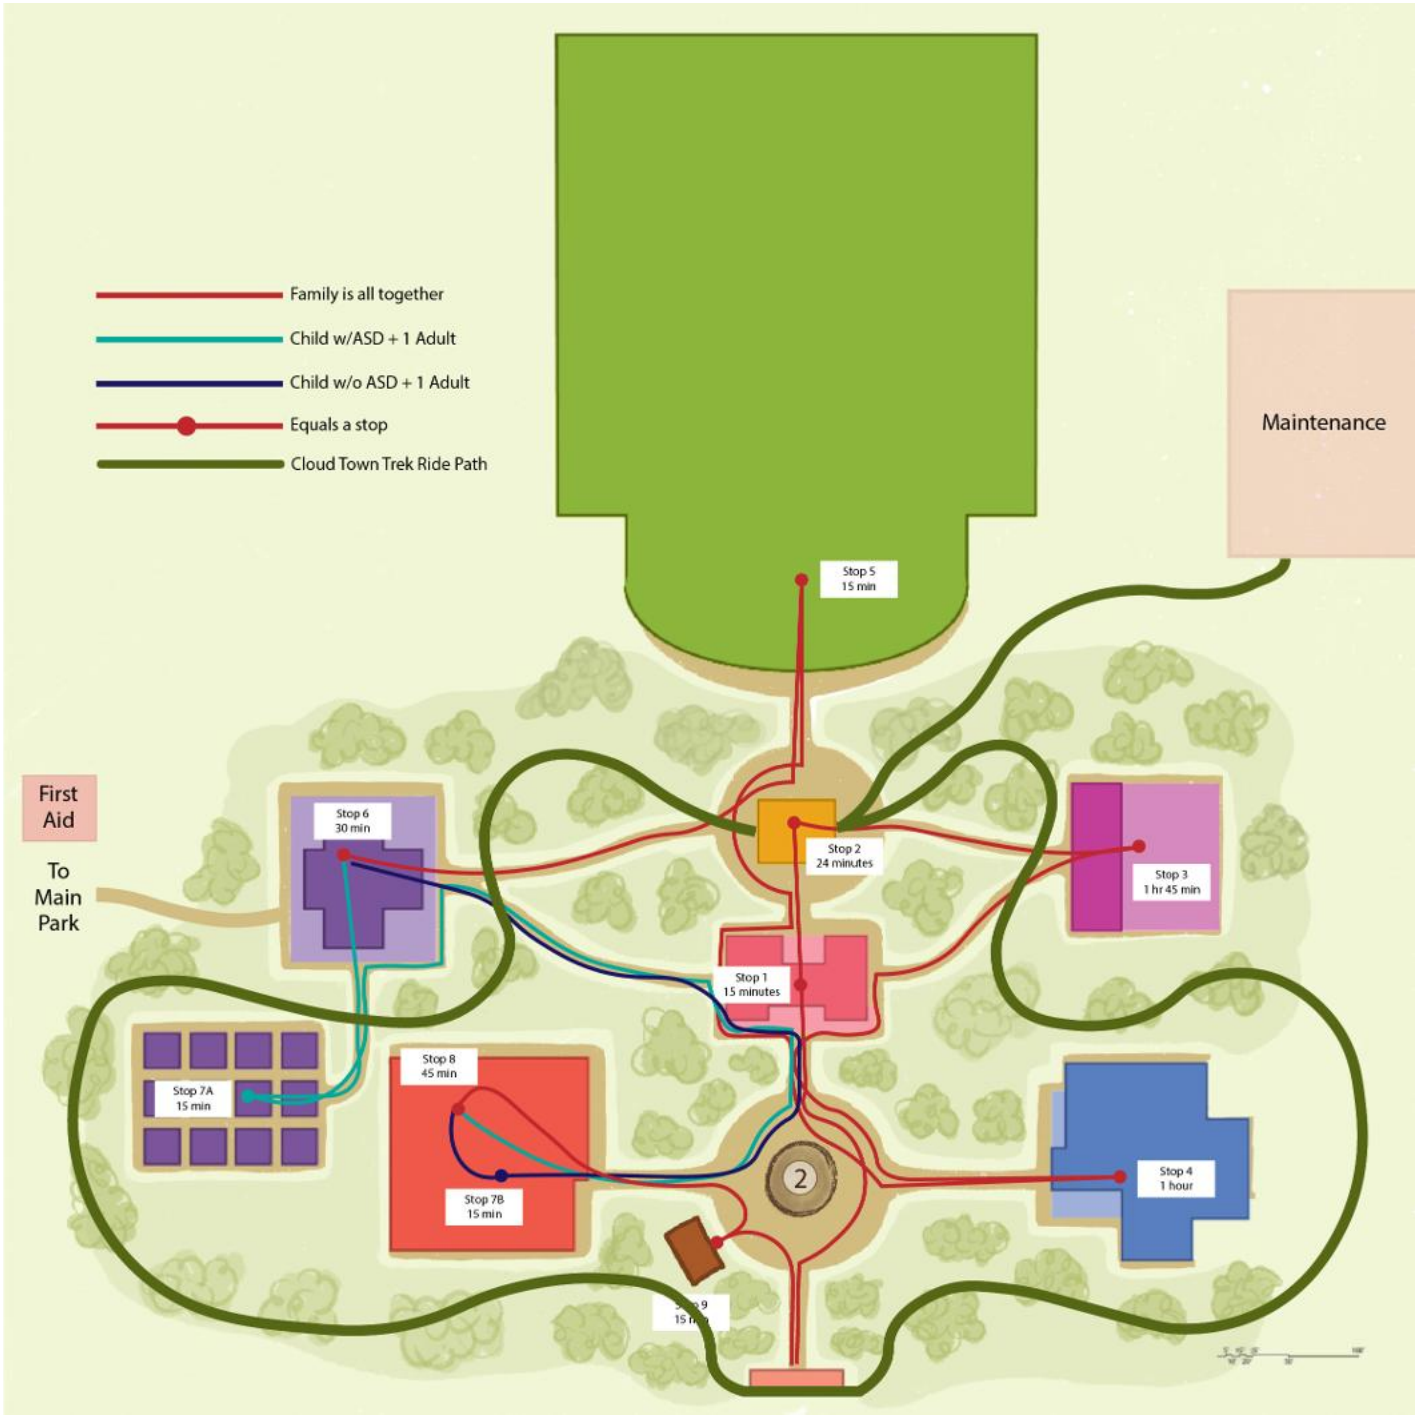

TIMING SHEET

Description of Demographic	**Family of four on vacation consisting of two adults, one 7 year old child with ASD, and one 4 year old child; Use the Accessibility Pass in the Theme Park (Cloud Town's Attractions are virtual queue once a wait time exceeds ten minutes though, so Accessibility Pass is not needed for accessing attractions); Gain priority access to the land if capacity is close to being reached due to having Accessibility Pass**

Date:	5-Nov-23

Accessibility Guide

Cloud Town will not utilize Attraction Return Times because all attractions will automatically administer return times to all Guests when waits are above 10 minutes.

Virtual Queues
In Cloud Town, we automatically utilize virtual queues for any experience that surpasses a 10-minute wait time.

Mobile Checkout and Ordering
Our food and beverage and retail locations will always offer both in-person checkout/ordering and mobile checkout/ordering.

First Aid and Baby Care
The first aid and baby care center is located just outside the entrance to Cloud Town and is easily accessible whenever needed.

Sensory Rooms
Sensory rooms are available in the Cloud Town Clubhouse in both the children's area and the adult lounge. These areas are open for any Cloud Town Guest to access whenever needed.

Quiet Rooms
Individual quiet rooms may be reserved in periods of 15 minutes for those who need a more secluded cool-down experience. Visit the Cloud Town Clubhouse to reserve a house.

Accessibility Pass

The Accessibility Pass is our commitment to ensuring an inclusive and enjoyable experience for all our Guests, regardless of their differing accommodation requirements. This pass has been designed to provide convenient and equitable access to our attractions and facilities. The Accessibility Pass allows Guests who qualify to be accompanied by up to five additional Guests, ensuring that everyone can share the experience together.

The Accessibility Pass is available for use throughout the entire theme park. To obtain an Accessibility Pass, Guests may visit Hospitality Hall or any other Guest Relations center in the theme park.

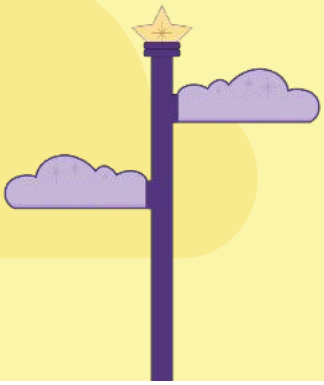

Priority Entrance
The Accessibility Pass will keep priority entrance open for all holders of Accessibility Passes when in Free Entrance and Limited Entrance phases.

Designated Assistance Centers
There are established Assistance Centers located throughout the park that provide guidance on attractions, accommodations, and any additional assistance needed. Hospitality Hall, the Guest Relations location within Cloud Town, will serve as the main hub of these centers.

Clear Signage and Assistance
Throughout Cloud Town, you will find clear signage indicating accessible routes and services. Staff is also readily available to aid and answer any questions.

Folio's Quiet Kitty Cafe and Folio's Bookshop	3	5	1	3	4
The Inspiration Knoll	3	0	2	3	1
Pilot's Post House	2	0	4	3	1

Cloud Town Clubhouse

Clubhouse – Kids' Sensory Play

In the Kids' Sensory Room, kids are able to interact with sensory toys that allow them to decompress and relax.

CLOUD TOWN CLUBHOUSE

Clubhouse – Adult Lounge

The Adult Lounge offers a serene place for adults to relax, meditate and find calm amongst a stimulating theme park day.

Touch	Taste	Sound	Sight	Smell
3	0	3	4	1
High touch on items in the playground and spray play, as well as the Star Trek	No stimulating tastes	Sounds of children playing in the area	Interactive items within the space for viewing	Minimal smell stimulants

Touch	Taste	Sound	Sight	Smell
2	0	3	3	1
High touch on items in the adult lounge	No stimulating tastes	Minimal sound stimulants	Sensory visuals available for adults to see	Minimal smell stimulants

Playgrounds and Cafes

Garden of Inspiration

As visitors enter the Garden of Imagination behind the Star Trek Academy, they become a part of this enchanting story. They are invited to make a wish, touch the stars, and let their imagination run wild. As they explore, they'll find that the garden responds to their dreams, with flowers changing color, whimsical sculptures coming to life, and pathways appearing where they wish to wander.

Folio's Quiet Kitty Cafe and Folio's Bookshop

Folio lives a very relaxed life and manages his shop where Dream Weavers and visitors alike can relax and explore his book collection, grab a quick meal, and watch his kittens dream of their own big adventure. Visitors of Cloud Town are encouraged to purchase a book for their loved home.

Touch	Taste	Sound	Sight	Smell
5	1	5	2	1
High touch on the playground and spray play, as well as the Star Trek	Possible taste associated with playing in a water spray play	Many sound stimuli associated with the area playing in the area	Sights of the playground, spray play, and the Star Trek Projection sights on the Star Trek	Minimal smell stimulants

Touch	Taste	Sound	Sight	Smell
3	2	3	3	1
Touch associated with eating food and being entertained with Reading through a book	Full meals and coffee available to eat	Minimal sound interference	Many sights associated with the building, reading a book in a cozy and safe	Smells associated within a cafe

Sensory Level Summary

Note: All scores are given comparatively to other attractions in Cloud Town, and NOT the overall park.

Attraction	Touch	Taste	Sound	Sight	Smell
Cloud Town Trek	3	0	3	4	1

Pilot's Post House	2	0	4	3	1

Attractions

Cloud Town Trek

Curious visitors board their very own cloud vehicle and traverse through the quaint community to experience all there is to do and see. Elevated above the town and narrated by Brawner, the trek engineer, this tour provides Guests with the history, traditions, and future plans
for Cloud Town.

Touch	Taste	Sound	Sight	Smell
3	0	3	4	1
- Touch of ride vehicle - Potential touch sitting next to party members	- No stimulating tastes	- Background music - Ride narration	- View of entire land - Sights of the ride track and its decorations	- Smell of surrounding land

Houses and Walking Trails

Dreamscape Estates

Reserved specifically for one group of guests, each house serves as a dedicated space to relax, cool down, and unwind. Guests can explore the homes to see how the
Dream Weavers live, or they can participate in a short meditation exercise, breathing routine, or sensory activity.

Touch	Taste	Sound	Sight	Smell
3	0	2	3	1
- Touch of sensory room offerings	- No stimulating tastes	- Meditation narration	- Meditation ambiance views on LED window panels	- Minimal smell stimulants

Discovery Dreamlanding

The Dream Weavers have pulled a few dream clouds to the ground for all to experience
and explore. For the very first time, visitors of Cloud Town can get a glimpse into what it's like to
be a Dream Weaver. Guests are invited to step into the dream clouds and explore three different
dreams through interactive walking trails filled with storytelling, excitement, and wonder.

Touch	Taste	Sound	Sight	Smell
5	0	4	5	1
- High interactivity with props and items throughout the trail	- No stimulating tastes	- Sounds associated with live performers and animated props	- Visually stimulating storytelling all throughout the trails; lots of colors, lights, and objects to see	- Minimal smell stimulants

Cloud Town Clubhouse

Clubhouse - Kids' Sensory Play

In the Kids' Sensory Room, kids are able to interact with sensory toys that allow them to decompress and relax.

Clubhouse - Adult Lounge

The Adult Lounge offers a serene place for adults to relax, meditate and find calm amongst a stimulating theme park day.

Touch	Taste	Sound	Sight	Smell
4	0	3	3	1
- High touch with interactive sensory items	- No stimulating tastes	- Sounds of children playing in the area	- Interactive items within the space for viewing	- Minimal smell stimulants

Touch	Taste	Sound	Sight	Smell
3	0	1	3	1
- High touch on items in the adult lounge	- No stimulating tastes	- Minimal sound stimulants	- Sensory visuals available for adults to see	- Minimal smell stimulants

Playgrounds and Cafes

Garden of Inspiration

As visitors enter the Garden of Imagination behind the Star Tree Academy, they become a part of this enchanting story. They are invited to make a wish, touch the stars, and let their imaginations run wild. As they explore, they'll find that the garden responds to their dreams, with flowers changing color, whimsical sculptures coming to life, and pathways appearing where they wish to wander.

Folio's Quiet Kitty Cafe and Folio's Bookshop

Folio lives a very relaxed life and manages his shop where Dream Weavers and visitors alike can relax and explore his book collection, grab a quick meal, and watch his kittens dream of their next big adventure. Visitors of Cloud Town are encouraged to purchase a book for their travel home.

Touch	Taste	Sound	Sight	Smell
5	1	5	2	1
- High touch on the playground and spray play, as well as the Star Tree	- Possible taste associated with playing in a water spray play	- Many sound stimuli associated with children playing in the area	- Sights of the playground, spray play, and Star Tree - Projection sights on the Star Tree	- Minimal smell stimulants

Touch	Taste	Sound	Sight	Smell
3	5	1	3	4
- Touch associated with eating food - Touch associated with flipping through a book	- Full meals and coffee available to eat	- Minimal sound interference	- Many sights associated with this building containing both a shop and cafe	- Smells associated within a cafe

Entertainment and Retail

The Inspiration Vault

Located in the town bank, Guests commemorate their journey to Cloud Town by shopping among the Dream Weaver's collection of feel-good finds.

Touch	Taste	Sound	Sight	Smell
3	0	2	3	1
- Lots of merchandise available for grabbing	- No stimulating tastes	- Noises of surrounding guests and coming from Pilot's Post House	- Visual merchandise and props	- Minimal smell stimulants

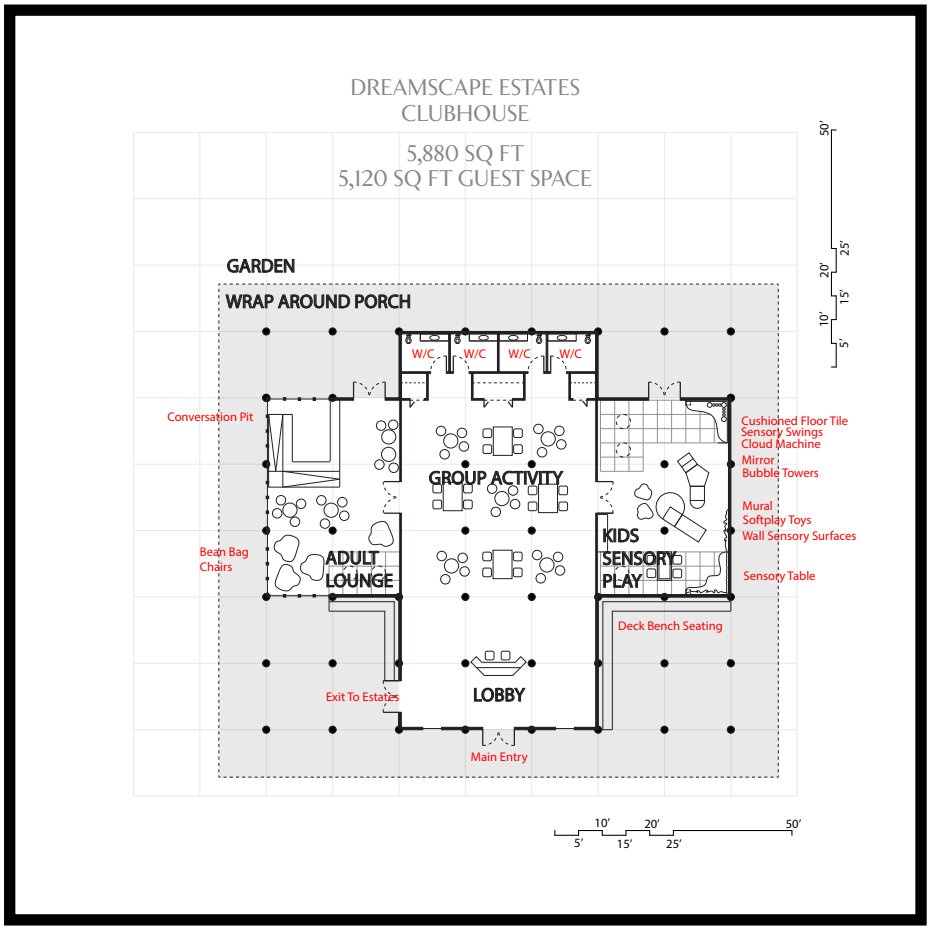

Pilot's Post House

Dream-sharing sessions are led every hour by The Pilot. The Pilot is leads multiple shows throughout the day. This character explains that while their childhood dream was to become a pilot, they always felt like they needed to follow in the family business of postal delivery. At this location, guests are able to engage in package pickup and delivery.

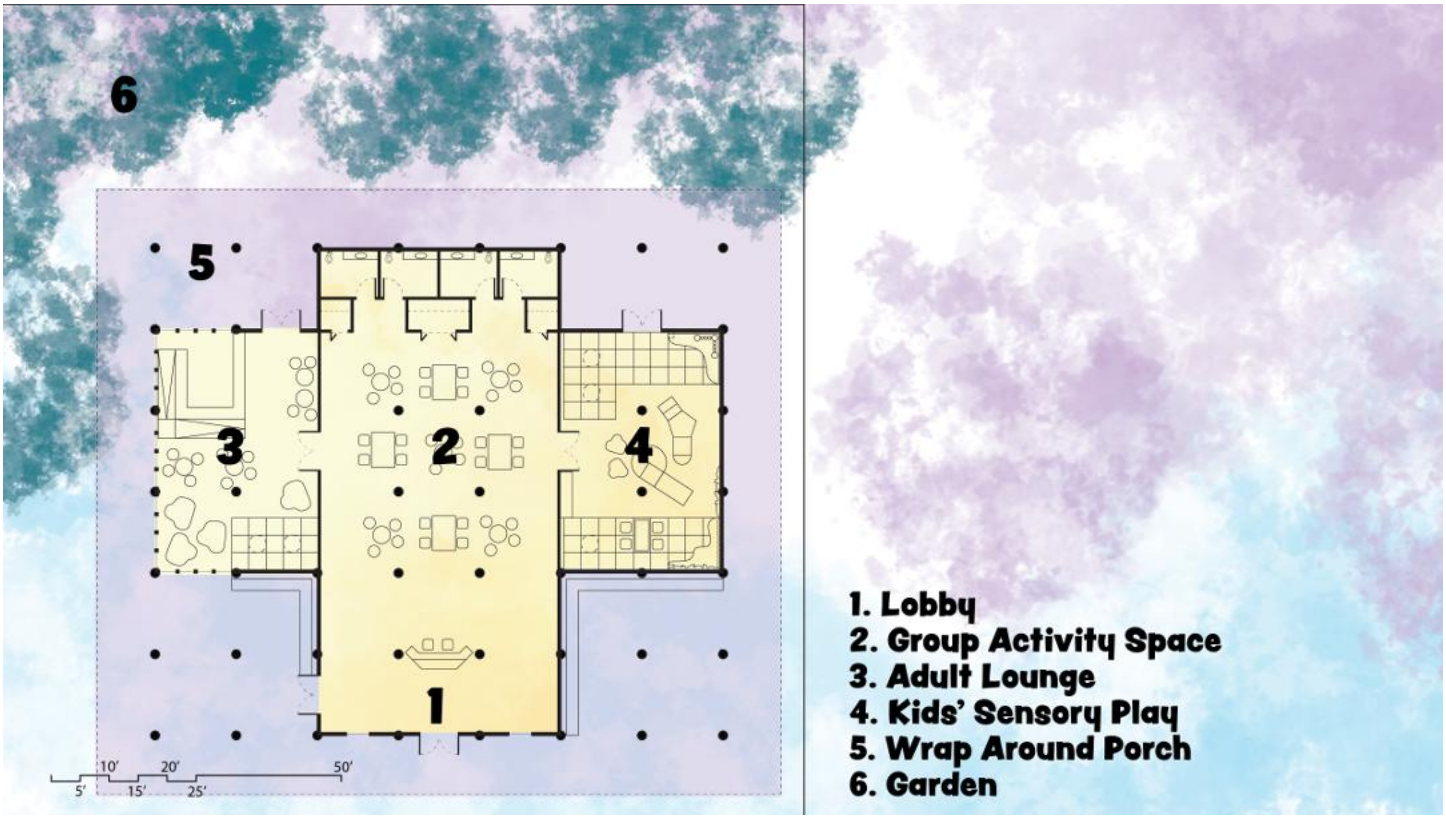

Touch	Taste	Sound	Sight	Smell
2	0	4	3	1
- Package pick-up and delivery touching - Sitting down to watch the entertainment show	- No stimulating tastes	- Sounds of Pilot's dream-sharing session and sound coming from the Inspiration Vault	- Sights included in Pilot's dream-sharing session	- Minimal smell stimulants

ATTRACTION SCRIPT

Revision 3
Charlie Suhling
11.27.2023

SCENE 1 – LOAD STATION 0:00-0:15

Guests board their cloud vehicles and take their seats. Upbeat, dreamy lo-fi music plays in the station.

AVERY
Greetings! And welcome aboard! Please remain seated for today's trek through Cloud Town. Our journey is about to begin.

Attraction Attendants conduct a final safety check and give the all-clear to the operator. The train begins to move.

SCENE 2 – START AT THE BEGINNING 0:15-0:45

The train exits the station and audio of a train moving on a track begins to play.

AVERY
My name is Avery and I'll be your Conductor, Tour Guide, Historian, and Resident Dream Weaver for today's trip.

What's a Dream Weaver you ask? Well, each dreamer in the universe has their own cloud floating somewhere in the sky. When you wake up in the middle of your dream, sometimes those ideas get misplaced, so the Dream Weavers collect the lost dreams and bring them down to Cloud Town for safe keeping.

Now that we've covered the basics, it's time for a tour!

SCENE 3 – THE WISHING TREE 0:45-1:20

Rounding a corner, the ride vehicle passes right in front of Star Tree Academy, a schoolhouse with a whimsical flair.

AVERY
Down on your left is Star Tree Academy – a pretty good place to start the tour since this is where all our young Dream Weavers begin their training.

Many years ago, the first Dream Weavers were searching for a new place to call home. They traveled day and night until they found this beautiful Star Tree. The group made a wish,

and now we have Cloud Town! That just goes to show the power of what dreaming can do!

SCENE 4 – FELINE FOUNDRY 1:20-2:15

Ride vehicle continues around the winding path, traveling behind Folio's Book Shop and Quiet Kitty Café. Cat meow sound effect plays.

AVERY

Did you hear that? The kittens at Folio's Quiet Kitty Café are almost as sweet as the Confectionary Clouds being served in this cute and cuddly restaurant. Why are there so many kittens here? That's a great question!

Before he retired, Folio was the Dream Weaver responsible for all the feline dream clouds throughout the universe. He quickly discovered that cats share his passions of sleeping, storytelling, and snacking.

Right next door to the café is Folio's Book Shop – the best place to grab a cup of coffee and peruse the largest collection of stories on this side of the Star Tree!

Make sure to stop in for a snack and a story while you're in town!

SCENE 5 – THE TOWN CENTER 2:15-3:10

Guests are now at the front of the land, passing over the cobblestone bridge that marks the entrance of Cloud Town.

AVERY

Now that we are about halfway through our tour, you may recognize this area – welcome to Exordia Park! Named after our first Dream Weaver and founder of this dreamy community, Exordia is the one who discovered that balloon travel is the best way to hop between dream clouds.

This is the central hub of Cloud Town, home to shopping, dining, entertainment, and discovery! If you have questions about your visit, or want more information on our accommodations, please drop in at Hospitality Hall, our full-service welcome and information center. Located right in the heart of Exordia Park.

SCENE 6 – SHOPPING & SHIPPING 3:10-4:05

Continuing forward, The Inspiration Vault and Pilot's Post House come into view.

AVERY

This may look like a bank, but there is no money in this vault. Instead, we have a collection of feel-good finds available to take with you on your journey. Inside The Inspiration Vault you will find a curated collection of plush clouds, whimsical toys, and unique apparel to commemorate your visit to Cloud Town.

If you want to shop but don't want to carry around shopping bags all day, drop off your purchases right next door at Pilot's Post House and pick them up at the end of the day!

At Pilot's Post house, you can join the pilot in a Dream Sharing sessions every hour. Here, visitors of all ages take part in an interactive story time. You can mail a letter to your very own Dream Weaver and let them know about your dreams, wishes, and aspirations. It's kind of like a real-life vision board!

SCENE 7 – ESCAPE TO THE ESTATES 4:05-5:35

Guests can now see Dreamscape Estates and Cloud Town Clubhouse.

AVERY

Have you ever wondered where the Dream Weavers live? Look no further than Dreamscape Estates! Our quiet neighborhood provides a safe and sensory friendly break from the hustle and bustle of the town. Make sure to visit the Clubhouse or Hospitality Hall to learn about how you and your group can reserve a time to cool down and unwind in one of our houses.

The Clubhouse is located at the entrance to the neighborhood and is always open for relaxation and exploration. Stop in for activities throughout the day.

SCENE 8 – STEP INTO A DREAM 5:35-6:40

The Discovery Dreamlanding show building is now revealed to Guests as the ride vehicles round the corner from the Clubhouse.

AVERY
I like to think that every day in Cloud Town is a special occasion, but today is extraordinary! Since we couldn't bring you all up into the clouds with us, we decided to pull down the clouds for you! We call it "Discovery Dreamlanding" – it's the best way to experience firsthand what it's like to be a Dream Weaver.

When you step into these clouds, you will experience three unique dreams available for exploration at your own pace. From a mermaid lagoon to an enchanted forest, and even a circus in the clouds, this is a once-in-a-lifetime chance to explore and discover the wonder of dreams!

SCENE 9 – BACK TO THE BEGINNING 6:40-7:00

AVERY
And now, our tour comes to a close. But your adventure through Cloud Town is just beginning. Go on and discover your own dreams as you explore our beautiful town.

If you need anything at all, ask one of us Dream Weavers for assistance. After all, Exordia said it best, "Even the smallest of dreams require a little inspiration to get off the ground."

Thank you for joining us today and enjoy the rest of your visit to Cloud Town!

Ride vehicle pulls into station.

Please remain seated.

Ride vehicle is safe to unload.

Watch your step as you depart the train. Have a wonderful day!

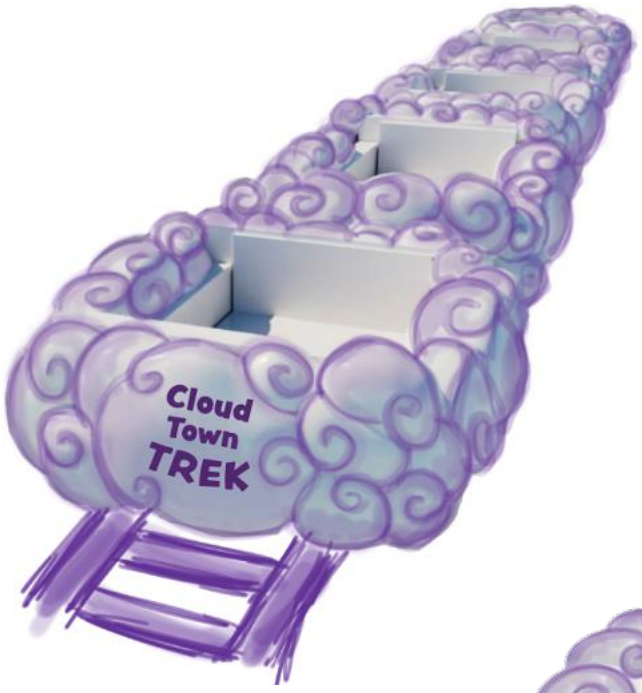

CLOUD TOWN TREK

Cloud Town

Story of Cloud Town

Cloud Town is a community that exists in no specific time or place. Its residents, called **Dream Weavers**, traverse the universe in hot air balloons to procure objects, collect stories, and gather inspiration. Their town serves as a repository of "all things good". These provisions are shared among the community and taken along on journeys as the Dream Weavers build the dreams of people all over the universe. Each person, animal, and creature has their own cloud in the sky - this is where their individual dreams are stored. These clouds hold all the inspiration for each individual being, so that they can construct their own dreams while they sleep. The Dream Weavers have one goal: to inspire dreamers of all ages to dream of a brighter, happier, future.

Today, there are more dreamers and visionaries than ever! While this is a good problem to have, the Dream Weavers now find it difficult to keep close tabs on all of their constituents. Because of this, **the town is recruiting new members of their team, including part-time and seasonal positions as well!** Visitors to Cloud Town are encouraged to explore the community and learn about this very important profession.

Type of Experience

An inclusive, accessible, inspirational **theme park land** focused on relaxation and recovery.

Purpose

Design a land, connected to Orlando Theme Parks that provides guests a **break from crowds, a relaxing and fun atmosphere, and a way to stay cool**. Although there are spots that are less busy in Orlando based theme parks, there are no dedicated lands that focus on low sensory activities that are mindfully created with guests in mind who are sensitive to sensory overload.

Proposed Location and Size

Location: Existing Theme Park **in Orlando**
Size: **410,000 sqft**

Town Offerings

- C-Ticket **People Mover**
- Relaxing Themed **Walking Trails**
- **QSR** and **Retail** Locations
- **Quiet Locations** and Rooms
- Visitor/Welcome Center
- Playgrounds and Interactive Offerings

Rough Estimate

TOTAL: $580,207,008

Soft Costs: $66,138,460
Facility/AD: $218,715,990
Show: $131,376,065
Ride: $55,482,500
Demo: $47,171,301
Capital Allocation: $14,151,390
Contingency: $47,171,301

Target Audience

Families with children, focusing the emphasis on guests facing overstimulation, heat exhaustion, and mobility challenges

Special Requirements

Criteria for Success

What is the Problem?

Orlando theme parks can be overwhelming, stressful, and overstimulating, especially for people with mental illnesses and disabilities. Heat continues to rise and compounds this problem, making it hot and uncomfortable, especially in the summer months. This project seeks to solve overstimulation by providing a relaxing, inclusive, getaway to cool down, mentally and physically, while visiting Orlando theme parks.

Problem Statement

We will design a land, meant to be located within to existing Orlando theme parks, that 1) gives guests a break from crowds, 2) creates a relaxing and fun atmosphere, and 3) provides a way to stay cool. Although there are areas within Orlando-based theme parks that are typically less busy, there are no dedicated lands that focus on low-sensory activities and that are mindfully created to help guests who may be sensitive to sensory overload or other elements.

Criteria for Success

- The design must be relevant for guests of all ages, and areas for guests of all ages to decompress (i.e. child-focused areas, adult-only areas, and integrated areas).
- The design must be whimsical and pleasant.
- The design must use evidence-based approaches including, but not limited to, color theory and design choices to promote relaxation and de-escalation.

- The design must be accessible for all using a Universal Design approach. Universal Design is the "design and composition of an environment so that it can be accessed, understood and used to the greatest extent possible by all people regardless of their age, size, ability or disability" (*What is Universal Design, n.d.*).
- The design must be 100% wheelchair accessible.
- The design must be inclusive of individuals who are particularly sensitive to sensory overload: autism spectrum disorder (ASD), attention-deficit/hyperactivity disorder (ADHD), sensory processing disorder (SPD), psychotic disorders, anxiety, depression, and post-traumatic stress disorder (PTSD).
- Staff in the land must be trained to make the land a certified autism center vita IBCCES: https://ibcces.org/theme-parks-and-amusement-parks/.
- The design must be inclusive of individuals who have sensory disabilities and impairments: ASD, blindness and low vision, deafness and loss of hearing, and SPD.
- The design must not perpetuate mental illness stigma.
- The design must limit overstimulation triggers: extreme temperatures, loud music, loud noises, crowded spaces, intense smells, bright light, unexpected environmental changes, unwanted physical contact, unexpected tactile contact, and bright light.
- The design must be significantly cooler in temperature than typical theme park lands. The goal would be 100% climate controlled to help reduce heat-related distress.
- The design must have an attraction, a retail space, a food and beverage space, and a space where guests can seek necessary medical attention while in the park.
- The design must be environmentally friendly.

Proof of Concept and Specialized Training

This document serves to recognize precedents in the themed entertainment industry, and in purposeful design in general that have catered to the needs of underserved populations who struggle with overstimulation and other forms of disability that affect how they can enjoy an attraction as well as demonstrating the specialized training needed in our park to be above and beyond a Certified Autism Center (CAC). Through research, our team has identified a few notable precedents: Peppa Pig Theme Park, Morgan's Wonderland, The Florida Blue Medicare Lounge at the Morocco Pavilion in EPCOT, Sensory Room at Lincoln Field, and Flamingo Crossings Town Center ER, as well as Certified Autism Centers such as Sesame Place in Philadelphia.

For utilizing specialized training, besides using available research, our team has consulted with specialists including a Board-Certified Behavioral Analyst who solely works with individuals with autism spectrum disorder (ASD), and a Licensed Clinical Psychologist who also works with individuals with ASD, and individuals with PTSD, ADHD, and anxiety. Cloud Town will include training for all Cast Members through partners KultureCity and The International Board of Credentialing and Continuing Education Standards (IBCCES). The training and resources with KultureCity will certify Cloud Town as a Sensory Inclusive attraction. The Cast Member training and analysis through IBCCES will certify Cloud Town as a Certified Autism Center (CAC).

The Philadelphia Eagles created a sensory room at Lincoln Field in 2019 and updated it in September of 2023. This is the most up to date example of a public sensory room at an entertainment venue. This inclusive space for individuals with ASD, PTSD, anxiety provides an opportunity to relax and calm down while at an Eagles football game. "With the prevalence

rate of autism increasing to 1 in 36 children, the need for sensory-friendly resources and support for individuals on the spectrum is at an all-time high," said Ryan Hammond, Executive Director, Eagles Autism Foundation. Although Lincoln Field is not a theme park, it is an entertainment venue and shares the similarity of having elements of overstimulation like a theme park including loud music, fireworks, and large crowds of people. “These factors plus the no re-entry rule at stadiums solidifies the need for a sensory room that allows guests to take breaks and then rejoin the experience. The sensory room provides a dedicated space designed by medical professionals for those who may need a quieter and more secure environment. This is imperative to ensure fans have a great guest experience. The sensory room is outfitted with bean bags from Yogibo, the visual light panels by Nanoleaf, activity panels, Sparkle Interactive Light (by NunoErin - a therapeutically fun furniture embedded with soft glowing lights that respond to motion), bubble walls, and a custom tactile artwork created by an autistic artist.” The Philadelphia Eagles have an Eagles Autism Foundation and works with other organizations like CHOP (Children’s Hospital of Philadelphia), and KultureCity, a nonprofit organization which trains staff at venues and then certifies venues which have sensory inclusive modifications. Cloud Town would also partner with KultureCity to be a certified Sensory Inclusive attraction. Through KultureCity’s Sensory Inclusive training it includes staff training not just for ASD, but for all individuals sensitive to sensory overload. Programs like KultureCity demonstrate the need for inclusion at attractions and establish that 1 in 6 individuals in the USA has a sensory processing need, so it is imperative to understand and accept the community. KultureCity also provides Sensory Bags that include headphones, ID badges, and fidget toys. These would be available to check out at our hospitality hall.

Our team designed Cloud Town's sensory room in the clubhouse, taking inspiration from the Philadelphia Eagles' sensory room. We enhanced it by increasing its size and incorporating two distinct sections: one catering to children and the other tailored for adults. Additionally, we themed it to align with the whimsical atmosphere of our land. We also included individual sensory meditation spaces in the Dreamscape Estates as a more individualized opportunity for relaxation, geared toward those who may be experiencing higher levels of anxiety or discomfort. The individual houses provide guided meditation opportunities and a space to calm down either by oneself or with their family or close friends, as well as opportunity for discovery and delight with theming to match the land.

The Dreamscape Estates are built from the desire to create the most inclusive and relaxing opportunity for guests at a theme park. Inspiration came from a hospital setting that is sensory forward, Flamingo Crossings Town Center ER, from Advent Health, which partnered with Walt Disney World. Our team member, Mary Levinsky, attended the TEA Talks Behind the Scenes Panel discussion about this new center and learned how it was designed purposefully to provide the most relaxation in times of anxiety and stress while at a hospital and being inclusive of those who have sensory difficulties. One aspect that was taken from this, is the opportunity to provide autonomy to the patient through an interactive screen in the hospital rooms, which controls lights, music, and games. Providing autonomy gives an individual a sense of control that can reduce anxiety. In the Dreamscape Estates, individuals will have an interactive screen and have the option to choose from 5 different meditations to relax, paired with different visuals to give them an individualized experience. This also allows an opportunity for sponsorship of Headspace, a meditation app, and to help provide new therapeutic tools to individuals to improve their health

through meditation, which is clinically proven to reduce anxiety. Other comforting elements the designers used in Flamingo Crossings Town Center included artwork inside the rooms to create homelike familiarity, which we will also use inside the Dreamscape Estates.

Peppa Pig Theme Park (PPTP) is a Certified Autism Center (CAC). PPTP earned this CAC accreditation through partnership with The International Board of Credentialing and Continuing Education Standards (IBCCES) including a sensory guide, staff training and education, and a HERO Access pass. The sensory guide helps guests with cognitive difficulties including ASD navigate which parts of a land may be most suitable for them. The specialists at IBCCES provided a score from 0 (low sensory stimulation) to 10 (high sensory stimulation) for the five senses, touch, taste, sound, sight, and smell for every attraction. Another aspect of PPTP that demonstrates the need for inclusive theme parks is their HERO Access Pass which allows expedited attraction access for the guest who is assigned the pass and their party to visit an attraction. The pass is assigned to individuals who have difficulty waiting in a line. Cloud Town will include a sensory guide, staff training through IBCCES, and Our team is including this type of sensory guide in Cloud Town as a resource, available inside our Hospitality Hall, as well as the same staff training through IBCCES, and a pass like the HERO pass to allow quick access to attractions. Besides including all these considerations, our team is going above and beyond by designing the park to reduce the need for lines in general by limiting capacity and including more attractions that would not need a line. Unlike Peppa Pig Theme Park, we will be inclusive of a broader age demographic and have increased climate-controlled spaces to prevent overstimulation brought on by weather.

Like Peppa Pig Theme Park, Sesame Place Philadelphia has staff trained in interacting

with children with ASD through IBCCES, has a sensory guide, and is a CAC. They also offer complementary noise-canceling headphones, WhispEars™, provided by KidCo. They offer customer service for sensory related accommodations and have a quiet room available. “The Quiet Room has adjustable lighting and a comfortable seating area for guests to take a break. The Quiet Room is locked to ensure privacy for our guests. Guests who would like to use the Quiet Room can visit the Welcome Center to receive the code needed to enter.” Inspired by Sesame Place, Cloud Town will offer quiet rooms that are available with a code or key, through the Dreamscape Estates. However, Cloud Town has more spaces available, with more immersive theming.

Meow Wolf is also a CAC through IBCCES. “Meow Wolf believes that art and creativity should be accessible to all, and that's why we're so proud to be a Certified Autism Center™,” says Brian Loo, VP of Operations Development and Exhibition Engineering at Meow Wolf. He and Megan Sada, Assistant Manager of Operations Development at Meow Wolf, spearheaded the program. “By prioritizing inclusivity and accessibility, Meow Wolf creates a better experience for everyone, considering their individual needs and abilities. We want everyone who visits Meow Wolf to feel welcomed, supported, and empowered to explore our immersive installations.” Meow Wolf is an inspiration for Cloud Town’s Walking Trails. Meow Wolf has highly immersive trails that are mostly themed as artful, psychedelic experiences. They are family friendly but geared more toward adults than other family friendly attractions. Meow Wolf’s art is very maximalist and stimulating. Cloud Town’s Walking Trails will be interesting, artful, and immersive, but less intense to create less sensory triggers for individuals.

Morgan’s Wonderland prioritizes physical accessibility for those with mobility issues.

Their mission statement is to provide a “fun, clean, and beautiful environment free of physical and economic barriers that all individuals can come to and enjoy regardless of age or ability.” The park is completely wheelchair accessible with 25+ rides, playscapes, and interactive elements. Morgan’s is a non-profit organization and is free to any individual with a disability, and accompanying guests pay a nominal fee. Cloud Town took inspiration from Morgan’s Wonderland into making wheelchair accessibility a priority, and including ride design for wheelchair use, like wheelchair swings and seating in rides, as well as details like providing specialty designed waterproof strollers and wheelchairs for guests in the splash areas. Morgan's Wonderland stands out for its affordability, making it an excellent example of an accessible amusement park. In contrast, Cloud Town will not be a non-profit, so will have a higher price tag associated with entry. In exchange for this value, our project is dedicated to upholding the high standards that people typically associate with immersive themed environments, setting it apart from Morgan's Wonderland.

The Florida Blue Medicare Lounge in EPCOT is a temporary pop-up located inside the former Restaurant Marrakesh of the Morocco Pavilion, that offers complimentary refreshments and relaxation focused activities like mosaic art, and henna. They explain that the process of making art “encourages the release of endorphins — feel-good chemicals that can improve mood and even reduce pain.” The interior is still decorated as Restaurant Marrakesh, but there are Florida Blue Medicare Lounge banners throughout the space. The pop-up is open from 12pm-6pm, from September through November 18th, 2023. Cloud Town will include sensory activities like art making in the Clubhouse. The Florida Blue Lounge demonstrates the need for calming down when in a busy theme park. However, since it is a temporary pop-up, and is not

themed to be purposeful, it can feel like an afterthought. The limited hours also do not make it accessible to the full hours of the park opening.

Our team plans on implementing the design and operational elements that have proven effective in the listed spaces. Our goal is to follow the lead of the designers who have begun to make these considerations while also reaching beyond what they have been able to achieve. With these intentions, we plan on designing the ultimate sensory friendly themed experience.

Mockups

To continue creating Cloud Town, a variety of mockups will be needed:

- Models
    - BIM360 Model
        - A BIM3690 model of the entire land will be needed so that all divisions of work may go into it and input any of their details and designs. This will allow everyone to be on the same page in real-time, and this will make communication of ideas much quicker. Furthermore, team members will be able to heck for any clashes and opportunities with provisions from other disciplines.
    - Unreal Animatic
        - So that team members may experience what it would be like to walk through Cloud Town, the BIM360 model will be turned into an animatic that gives everyone a first-person perspective of what the land should look and feel like.
    - Physical Model
        - A physical model of the exterior land is imperative to understand scope, size, and

locations. While the best model material has not been specified yet, it is a non-negotiable that this is something needed to make this dream Cloud Town come true.

- Interactive Mockups
    - Play Tests for the Walking Trails
        - The team developing Cloud Town wants to make sure they are as detail oriented as possible creating the walking trails in Discovery Dreamlanding. Since many of the walking trails are being designed for guests to be able to interact with them, especially guests of varying abilities and needs, there is a need to create mini-real-life mockups of the trails for play testing. This will allow the team to understand how the interactive components of the land are received by guests.
            - Diving specifically into the Mermaid Lagoon walking trail, which is the main one that has been developed, mockups will need to be created for the four different areas that Guests walkthrough, including Zephyr's sandcastle zone, the Mermaid Guardian's cave, Captain Breezy Beard's shack, and the pirate ship. In each of these areas, playtests will need to be conducted to show how guests collect lost dreams throughout the trail and deposit them into Captain Breezy Beard's treasure chest before they exit the trail.
            - Referring to the Circus and Enchanted Forest walking trails, all interactive elements will have to be developed and play tested before being built on site.
    - Clubhouse Sensory Room Mockup
        - The sensory room in the Cloud Town Clubhouse is incredibly important for guests who are needing to escape into a zone that is sensory friendly and allows them to

decompress. Given how intentional creating this room needs to be, this room must be mocked up and tested by guests that are like those who will be visiting the theme park land.

- Dreamscape Estate Mockup
    - The Dreamscape Estates are a key component of Cloud Town and serve as the epitome of the land's purpose. To ensure that these serve the purpose that they are supposed to serve, guests with similar qualities to the guests that will be using them in the land must be able to walk through a mocked-up version of the space. Specifically, it needs to be checked that the furniture and meditation offerings match the needs of the guests. Sound settings and video settings need to be tested for the window monitor meditations, and the overall quality of the room needs to be addressed.
- Cloud Town Trek Mockup
    - A mockup of the Cloud Town Trek ride vehicle will also be created to ensure that it does not overload the senses. Both the standard vehicle and the wheelchair-accessible vehicles will be mocked up to ensure the utmost accessibility.

Highest Risks to Budget

Scope creep and feature creep is a risk to our budget during the initial phases of the project, although somewhat inevitable. Feature creep refers to the expansion or addition of new project elements or features. Feature creep could directly affect scope creep, which refers to changes in or expansion of the overall project scope. Many things can cause feature and scope creep, but some common examples are one requested deliverable developing into many deliverables, the needs of the project changing which will then require more or different deliverables, or the end goal of a certain area or the project changing. One thing that make feature and scope creep more likely is vague project requirements, goals, or parameters. Defining the scope and all the required features is a simple but huge way to mitigate creep. It can also be helpful to develop change procedures so that the entire team remains on the same page as the project naturally develops and so that elements only change or expand as needed. Finally, developing a work-breakdown structure (WBS) and closely monitoring the project allows the team to be proactive in handling all changes.

There are two risks that can have a huge impact on the budget once the project is completed. The first is business interruption. This refers to the closure of a business for unforeseen circumstances, such as repairs, external environmental factors, and more. This makes business interruption insurance a necessary expense, as to mitigate the financial impacts later. Secondly, our project will use some sophisticated technologies. It is inevitable that there will need to be repairs, that technological systems will go down, and that we will need to make updates, especially being in a high-touch environment. It will be essential to have proper care and upkeep of these technologies to limit the need to make updates and repairs to only when necessary and unavoidable.

Highest Risks to Schedule

One simple yet huge risk to the schedule of the project is the schedule estimate quality and sheerly running out of time. A tendency to be overly ambitious in timing estimates to the under-estimate the complexity of a task can cause a project to run behind schedule or feel rushed. It is important that the project remains on schedule as much as possible, but even more important that the schedule is made in a realistic way to make this possible. Having a team that can put together effective schedule deadlines and WBSs is essential to making credible schedule estimates.

Another risk factor to schedule is a design risk, which is essential having to rework initial designs or deliverables. This could be due to low quality, changes to the project, etc. but regardless, restarting deliverables can have a huge impact on time and achieving items before their due dates. Although this can sometimes be unavoidable, clear communication of expectations, and of changes to features, is key to keeping all deliverables up to date in a timely manner.

Finally, the schedule can be pushed back due to play tests, mock-ups, and feasibility/proof of concept studies. When working with new technologies and unique features, especially those which may be costly to produce, it is important to complete all due diligence to help ensure project success. Things like playtests may take longer than anticipated depending on the level of success that they have and the modifications to the project that they may require.

Highest Risks to Safety

A project like Cloud Town is a huge undertaking and the health and safety of everyone involved in its creation is essential. It is not only essential to a company that values its Employees and puts an emphasis on their well-being, but also because poor Employee wellbeing can be bad for Employee attendance or overall turnover, which can ultimately affect other project factors, such as budget and schedule. Many health and safety concerns for Employees can be easily addressed through Employee trainings and helpful reminders throughout the project. These concerns are things like neglecting ergonomic principles, careless use of personal protection equipment, and mental strain or stress. Other safety concerns, such as dangers due to fires, noise, or other physical stressors (heavy machine, dangerous substances, etc.) can be mitigated by hiring qualified Employees, ensuring that Employees are knowledgeable on proper use or materials and equipment, and having emergency response systems in place.

Once the project is completed and handed off to operations, the health and safety of both Employees and Guests becomes important.

Physical security due to external threats and safety from environmental/weather elements can be huge in theme parks. Cloud Town will work to ensure that there are emergency protocols in place for all situations and that all Cast Members are properly trained to respond to emergency situations.

Highest Risks to Scope

Projects that span many years can have many unforeseen changes, additions, and even cuts. It is often unavoidable and there are many uncontrollable factors that can ultimately impact a project scope. It is very possible to prepare for these things and to navigate the changes successfully. Changes to teams and structures and inevitable and a team that starts a project is rarely the same exact group of people who finishes it. Clear communication and documentation are key to keeping the project running smoothly. Despite best efforts, there is a high chance that items might run over budget, deadlines will be missed, or playtests and mock-ups will not work as expected. These are huge, and not only can change the course of a project and its scope, but they can also directly impact the overall budget and schedule. It is important to have a strong team who can monitor these changes and clearly define parameters throughout the project.

Highest Risks to Public Relations

The reputation of a project is obviously very important. Even before the project opens, it is important to generate excitement and demand for what you are creating. The biggest reputational risk is the gap between the goal perception of the project and how the public perceives the project. Cloud Town is working with some sensitive topics, and just as important as visibility and consideration are for some demographics, it is also essential to address them with respect and tolerance – not in a way that is tone-deaf and makes certain groups feel negatively different. Cloud Town will work with professionals and advocates from all demographics to ensure that we are treating everyone as equals and in a way in which they feel appreciated and seen.

The other risk to public relations relates more to perceived quality of our project (which can also reflect on our reputation and public perception). Risks that may “downgrade” our perceived quality is technologies, accessibility equipment, and important features being broken, non-functional, or poor condition. We will strive to use the highest quality products and systems

when building Cloud Town, to make it durable in a high touch environment, and to prioritize updates, renovations, and repairs without hesitation, whenever necessary, to not only keep the highest level of "show" in Cloud Town, but to also ensure that it remains accessible and continues to achieve the project goals long after the project opens.

Strengths

- Sensory Inclusive Attraction and Certified Autism Center
- Quiet Spaces Offered (Dreamscape Estates)
- Generous Space/ Limited Capacity to Meet the Goals of the Land
- Purpose-Built Design for Overstimulation
- New Captivating IP w/in an Existing Theme Park Guests Will Love
- Social Implication of the Company Building the Land
- New Market Penetration into an Important Group of People (Accessibility Emphasis)
- Broad Spectrum of Accessibility Features

Weaknesses

- Extreme Training Needed for Cast Members
- Minimal Profit-Generating Offerings
- Lack of Thrill Rides
- Low Capacity from Operations Perspective
- Expensive to Actualize
- 360 Degree Buildings (Need to Theme the Whole Building, all the way around)/ Difficulty Loading In and Out Product into Spaces that Are 360 Degree Visible to Guests

Opportunities

- Sponsorships with Advent Health, Headspace, the Calm App, Better Health
- Trend: Increased Focus on Accessibility
- Creation w/in an Existing Theme Park
- Geographic Location of Orlando, FL
- Trend: Increased Focus on Technology/ Mobile Apps
- Trend: Usage of Disability Passes in Theme Parks like the One Proposed in this Project

Threats

- Threats to Safety
  - Increased Popularity of Theme Parks Causing Overcrowding
  - Negligence of Cast Members
- Threats to Budget
  - Unpredictability of Demo of Pre-Existing Land
  - Inflation and Material/Supply Scarcity in a Post-Covid World
  - Price of Interactive Technology
- Threats to Schedule
  - Unpredictability of Demo of Pre-Existing Land
  - Long Duration Needed to Build Discovery Dreamlanding Compared to the Rest of the Land
  - Other Projects Being Prioritized
- Political Climate of Orlando, FL

RISK ASSESSMENT AND ANALYSIS

PROJECT TITLE	PROJECT CLOUD TOWN
LOCATION	LAND W / IN AN EXISTING PARK
DATE	11.7.2023
REVISION	8

High Risk	H
Medium Risk	M
Low Risk	L

KEYS TO TERMS CONTAINED WITHIN THE RISK ASSESSMENT			
Key Probability		Key Severity	
High Probability	H/P	Catastrophic	CAT
Probable (Med-High)	PRO	Critical	CRIT
Possible (Med-Low)	POS	Marginal	MAR
Low Probability	L/P		

CLASSIFICATION			**IMPACT**	
T	TECHNICAL	requirements, tech, interfaces, performance, quality, etc.	B	BUDGET
E	EXTERNAL	customer, contract, market, supplier, etc.	SD	SCHEDULE
O	ORGANIZATIONAL	dependencies, logistics, resources, budget, etc.	ST	SAFETY
A	ACCESSIBILITY		SC	SCOPE
PM	PROJECT MANAGEMENT	planning, schedule, estimates, controlling, communication, etc.	PR	PUBLIC RELATIONS

CODE TO EFFECTS OF RISK				
CALCULATING RISK RATING: MULTIPLY PROBABILITY BY SEVERITY Possible (2) X Marginal (1) = Risk Rating of (2) : Low Risk		Catastrophic	Critical	Marginal
High risk: >71 Medium risk: 20 - 70 Low risk: <20				
Probability Index	High Probability	100	40	4
	Probable	75	30	3
	Possible	50	20	2
	Low Probability	25	10	1

Probability Index			**Severity Index**		
1	Low Probability	Unusual / rare	1	Marginal	Paper cut / 0-5% cost change / 0-7 day schedule change / low change in scope or quality
2	Possible (Med-Low)	Even chance (50/50)	10	Critical	Minor injury / 5-10% cost change / >7 day schedule change / minor change in scope or quality
3	Probable (Med-High)	Not a surprise	25	Catastrophic	Major injury / >10% cost change / >14 day schedule change / major change in scope or quality
4	High Probability	To be expected			

RISK ASSESSMENT FULL ANALYSIS

RISK ASSESSMENT 1 - PROJECT CLOUD TOWN

Ref. No	Risk profile	Probability				Severity			Risk		Suitable Measures	Classification					Biggest Impact					Notes
		H/P	PRO	POS	L/P	CAT	CRIT	MAR	Score	L/M/H		T	E	O	PM	A	B	SD	ST	SC	PR	
1	**Risks to budget**																					
1.1	Audit risk				X		X		10	L	Strong knowledgeable team, adequate time for analyzation			X			X					Errors in financial statements despite auditing and verification having been done
1.2	Business interruption risk	X				X			100	H	Business interruption insurance			X			X					Lost income due to the closure of business due to unforeseen repairs
1.3	Commodity risks		X				X		30	M	Account for inflation in budget			X			X					Changes in commodity prices
1.4	Revenue risks	X					X		40	M	Strong estimate team and thorough scope document			X			X					Under budgeting
1.5	Cost overrun				X			X	1	L	Strong estimate team and thorough scope document			X			X					Over budgeting and uninvested capital
1.6	Estimate accuracy			X			X		20	M	Strong estimate team, adequate time for analyzation			X			X					Cost estimates are inaccurate
1.7	Exchange rate			X				X	2	L	Include a cushion in the budget			X			X					Volatile exchange rates increase costs
1.8	Unplanned cost	X					X		40	M	Include a cushion in the budget			X			X					
1.9	Scope creep		X			X			75	H	Define clear parameters, change protocol procedure, monitor, WBS			X			X					Cost of project increases due to changes in scope
1.10	Feature creep	X				X			100	H	Define clear parameters, change protocol procedure, monitor, WBS			X			X					Cost increase with the expansion or addition of new project elements or features
1.11	Price risks		X				X		30	M	Include a cushion in the budget			X			X					Increase on price inputs
1.12	Inflation risks			X			X		20	M	Account for inflation in budget			X			X					A broad-based increase in prices
1.13	Resource risks			X		X			50	M	Effective project management			X			X					Resource issues causing delays and increased costs
1.14	New legislation				X			X	1	L	Account for inflation in budget			X			X					Compliance costs
1.15	Interest rate			X				X	2	L	Account for inflation in budget			X			X					
2	**Project risks**																					
2.1	Design risks				X	X			25	M	Accurate special requirements document				X					X		Fail to meet the project requirements
2.2	Invalidation of project assumptions			X		X			50	M	Productive research and mock-ups				X					X		Project assumptions will be invalidated
2.3	Architecture risks			X		X			50	M	Research and communication across disciplines				X					X		Architecture does not support project goals
2.4	Supplier risks			X		X			50	M	Accountability and communication from project manager		X					X				Supplier fails to meet obligations
2.5	Political risks			X			X		20	M	Active monitoring of current events		X								X	Political event disrupts project
2.6	Project planning				X	X			25	M	Cross-department accountability				X			X				Project management itself fails
2.7	Reputation risks		X			X			75	H	Knowledgeable PR and GR departments		X								X	Gap between goal perception and actual perception
2.8	Competitive risks			X				X	2	L	Monitoring the industry and current events		X								X	Competition gains advantages
2.9	Demand shortfall			X			X		20	M	Research and surveys of market demand		X				X					No demand is generated
2.10	Latent demand			X			X		20	M	Demographic surveys		X				X					The project is not accessible to the customers who generate the demand
2.11	Seasonal demand				X			X	1	L	Investment in marketing and outreach		X				X					
2.12	Excess demand	X						X	4	L	Thorough guest flow and execution plans		X				X					Demand exceeds execution abilities
2.13	Demand volatility			X			X		20	M	Investment in marketing and outreach		X				X					Demand rises extremely fast and then collapses
2.14	Communication risks			X				X	2	L	Productive and relevant research and mock-ups		X								X	Changes are rejected due to unmet or unstated assumptions
2.15	Secondary risk		X				X		30	M	Oversight and monitoring from project management				X					X		Risk generated from managing risks
2.16	Known unknowns	X						X	4	L	Oversight and monitoring from project management				X					X		Information that you know is missing
2.17	Unknown unknowns	X					X		40	M	Oversight and monitoring from project management				X					X		risks beyond your information
2.18	Black swans	X					X		40	M	Oversight and monitoring from project management				X					X		
3	**Risks related to show elements**																					
3.1	Paint fading	X					X		40	M	Investment in products, regular touch-ups and maintenance			X			X					
3.2	Animated features not working	X				X			100	H	Regular maintenance, operation and care procedures provided			X			X					
3.3	Interactive technology out of order	X				X			100	H	Regular maintenance, operation and care procedures provided			X			X					
3.4	Impaired view of signs and visuals			X				X	2	L	Critical visuals included at multiple or ideal vantage points			X						X		
3.5	Poor area upkeep			X				X	2	L	Dedicated team to keeping the grounds			X							X	
3.6	Models being broken		X				X		30	M	Investment in high-quality products for high-touch areas			X			X					
3.7	Guests touching show pieces	X					X		40	M	Investment in high-quality products for high-touch areas		X				X					
3.8	Low staff to guest ratio			X				X	2	L	Staffing ratios based on predicted attendance				X						X	
4	**Data risks**																					
4.1	Vendor lock-in			X		X			50	M	Multi-level security on sensitive information	X					X					Vendor holds company data as a bargaining chip
4.2	Data loss		X			X			75	H	Thorough back-up procedures for all critical data	X					X					
4.3	Data corruption			X			X		20	M	Thorough back-up procedures for all critical data	X					X					
4.4	Data integration			X			X		20	M	Regular tech updates and tests	X						X				Failure of an integration process
4.5	Dark data risks			X			X		20	M	Multi-level security on sensitive information	X					X					
4.6	Data availability	X				X			100	H	Accessible crash kits for all critical tech systems	X						X				A data feed goes down
4.7	Data remanence				X		X		10	L	High-level tech experts on team	X									X	Disposing of equipment without properly wiping it
4.8	Compliance risks			X		X			50	M	Thorough following of all compliance standards	X					X					Accidentally providing customer details to a third-party
4.9	Data breech				X	X			25	M	Multi-level security on sensitive information	X					X					Losing database to an advanced, persistent threat
5	**Technology integration risks**																					
5.1	Process mismatch		X				X		30	M	Regular tech updates and tests	X					X					Broken processes due to integration issues
5.2	Productivity risks			X			X		20	M	Regular tech updates and tests	X						X				Low productivity due to lack of integration
5.3	Performance risks	X					X		40	M	Regular tech updates and tests	X						X				Slow or delayed integration that degrade performance
5.4	Incompatibility				X		X		10	L	High-level tech experts on team	X					X					
5.5	Data inconsistency		X					X	3	L	High-level tech experts on team	X					X					
5.6	Reliability	X					X		40	M	High-level tech experts on team	X					X					
5.7	Architectural risks			X				X	2	L	High-level tech experts on team	X					X					Poorly designed integration
5.8	Transactional integrity			X				X	2	L	High-level tech experts on team	X					X					
5.9	Operational outages			X				X	2	L	Tech support readily available to limit downtime	X									X	
5.10	Customer impacts		X				X		30	M	Tech support readily available to limit downtime	X									X	
5.11	Information security		X			X			75	H	Tech support readily available to limit downtime	X									X	
5.12	Project risk			X				X	2	L	High-level tech experts on team	X								X		
6	**Risks to schedule**																					
6.1	Estimate quality	X				X			100	H	High-level scheduler on project				X			X				Task complexity estimate is inaccurate
6.2	Dependency risks	X					X		40	M	Effective project management to monitor schedule and deadlines				X			X				Important dependency is not met and timeline is delayed
6.3	Unplanned dependencies		X				X		30	M	Effective project management to monitor schedule and deadlines				X			X				
6.4	Weather			X				X	2	L	Extra time built in to schedule for unforeseen factors				X			X				Weather events delay schedule
6.5	Resource risks				X		X		10	L	Extra time built in to schedule for unforeseen factors				X			X				Employee absenteeism or turnover
6.6	Technology risks			X				X	2	L	Extra time built in to schedule for unforeseen factors				X			X				Technology is disrupted, unavailable, or unfit
6.7	Infrastructure risks				X			X	1	L	Extra time built in to schedule for unforeseen factors				X			X				Infrastructure outages
6.8	Facility risks				X			X	1	L	Extra time built in to schedule for unforeseen factors				X			X				
6.9	Partner risks			X			X		20	M	Effective project management to monitor schedule and deadlines				X			X				Failure or low performance of a partner
6.10	Performance risks				X			X	1	L	Effective project management to monitor schedule and deadlines				X			X				Low team performance
6.11	Quality risks		X				X		30	M	Effective project management to monitor schedule and deadlines				X			X				Low-quality deliverables that require extra time for rework
6.12	Architecture risks				X			X	1	L	Extra time built in to schedule for unforeseen factors				X			X				
6.13	Design risks		X			X			75	H	Effective project management to monitor schedule and deadlines				X			X				A need to restart things at the design level
6.14	Scope creep	X				X			100	H	Extra time built in to schedule for unforeseen factors				X			X				Scope increase due to unforeseen factors
6.15	Dispute risks	X					X		40	M	Extra time built in to schedule for unforeseen factors				X			X				
6.16	Cybersecurity risk				X		X		10	L	Extra time built in to schedule for unforeseen factors				X			X				
6.17	Proof of concept, playtests, mock-ups	X				X			100	H	Appropriate time blocks dedicated to these phases				X			X				
6.18	Regulatory risks		X				X		30	M	Extra time built in to schedule for unforeseen factors				X			X				Delayed regulatory approvals
7	**Operations risks**																					
7.1	Personnel shortage			X				X	2	L	Proper staffing ratios up kept and monitored				X			X				
7.2	Changes to key systems		X					X	3	L	Appropriate staff training			X						X		
7.3	Process hazard		X				X		30	M	Operating and maintenance instructions incl. regular check			X			X					Process failures such as broken equipment that disrupt operations
7.4	Infrastructure risks			X				X	2	L	Operating and maintenance instructions incl. regular check			X							X	Infrastructure outages that disrupt operations
7.5	Resistance to change				X			X	1	L	Communication and training on project goals			X							X	
7.6	Overcrowding of an indoor location	X					X		40	M	Staff training to help crowd control and gust flow		X								X	
7.7	Failure of equipment, such as turnstiles	X				X			100	H	Operating and maintenance instructions incl. regular check	X					X				X	
7.8	Failure of visual equipment, such as screens and monitors	X					X		40	M	Operating and maintenance instructions incl. regular check	X					X				X	
7.9	Failure of audio equipment, such as speakers	X				X			100	H	Operating and maintenance instructions incl. regular check	X					X				X	
7.10	Failure of accessibility equipment	X				X			100	H	Operating and maintenance instructions incl. regular check	X				X	X				X	
8	**Human resource risks**																					
8.1	Talent shortage				X	X			25	M	Job fairs, recruitment bonuses, and accessibility			X				X				Inability to recruit employees
8.2	Skills shortage			X			X		20	M	Job fairs, recruitment bonuses, and accessibility			X						X		Lack of skills and competencies for employees
8.3	Employee turnover				X		X		10	L	Employee satisfaction and feedback surveys			X				X				The risk of losing employees, possibly in large quantities
8.4	Health and safety for employees		X				X		30	M	Health and safety measures included in employee policies			X					X			Workplace health and safety risks
8.5	Communication risks			X				X	2	L	Multiple, open channels of communication for employees				X						X	Poor communication leading to internal issues
8.6	Performance risks				X		X		10	L	Effective management team, positive employee reinforcement			X				X				Low performance of employees
8.7	Productivity risks				X		X		10	L	Effective management team, positive employee reinforcement			X				X				Low productivity from employees

8.8	Employee engagement				X					X	2	L	Effective management team, positive employee reinforcement				X					X			
8.9	Succession risks						X			X	1	L	Job fairs, recruitment bonuses, and accessibility				X					X			Replacing key personnel with equally competent employees
8.10	Company culture						X		X		10	L	Effective management team, positive employee reinforcement						X						
8.11	Workplace conflicts			X						X	3	L	Multiple, open channels of communication for employees				X								Conflict between employees
8.12	Employee conduct			X						X	3	L	Effective management team, positive employee reinforcement				X								
8.13	Reputation risks				X					X	2	L	Effective management team, positive employee reinforcement				X								
8.14	Compliance risks				X			X			50	M	Thorough measure in the employee handbook				X				X				Compliance issues related to employee or employment regulations
9	**Risks due to supply and inventory**																								
9.1	Input shortage				X				X		20	M	Thorough inventory processes and frequent counting				X				X				
9.2	Shrinkage	X					X				100	H	Thorough inventory processes and frequent counting				X				X				Inventory that disappears or expires
9.3	Excess inventory	X					X				100	H	Thorough inventory processes and frequent counting				X				X				
9.4	Supply shortfall	X								X	4	L	Thorough inventory processes and frequent counting				X							X	
9.5	Value loss		X							X	3	L	Thorough inventory processes and frequent counting				X				X				
9.6	Inherent risk				X				X		20	M	Thorough inventory processes and frequent counting				X				X				Control failure that results in an incorrect inventory count
10	**Health and safety of employees**																								
10.1	Neglecting ergonomic principles	X							X		40	M	Proper staff training and healthy reminders				X						X		
10.2	Unhealthy posture or special stresses			X					X		30	M	Proper staff training and healthy reminders				X						X		
10.3	Insufficient observance of anatomy			X					X		30	M	Proper staff training and healthy reminders				X						X		
10.4	Careless use of personal protection equipment				X			X			50	M	Proper staff training and healthy reminders				X						X		
10.5	Non-adapted local lighting						X		X		10	L	Proper staff training and healthy reminders				X						X		
10.6	Mental strain and stress			X					X		30	M	Proper staff training and healthy reminders				X						X		
10.7	Human misconduct, human behavior				X			X			50	M	Proper staff training and healthy reminders				X						X		
10.8	Improper design, improper placement, or identification control elements						X	X			25	M	Operating and maintenance instructions incl. regular check				X						X		
10.9	Improper design or placement of visual displays				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
10.10	Falling while entering or leaving the workplace	X							X		40	M	Proper signage, lighting, and materials-used				X						X		
10.11	Emission or oxygen deficiency at the workplace				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
10.12	Fire				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
10.13	Mechanical risks at the workplace: contact with rotating parts, knocking over, falling down objects, fracture of parts with high-rotating speed, contact of persons with machine parts				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
10.14	Insufficient visibility from the working position				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
10.15	Insufficient lighting				X				X		20	M	Operating and maintenance instructions incl. regular check				X						X		
10.16	Unsuitable seat				X				X		20	M	Health and safety protocols followed				X						X		
10.17	Noise at the workplace	X						X			100	H	Health and safety protocols followed				X						X		
10.18	Vibration at the workplace				X			X			50	M	Health and safety protocols followed				X						X		
10.19	Insufficient evacuation opportunities or emergency exits						X	X			25	M	Proper code followed				X						X		
10.20	Lifting cargo	X							X		40	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.21	Falling goods, collisions, impacts				X			X			50	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.22	Lack of stability				X			X			50	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.23	Uncontrolled motions				X				X		20	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.24	Unsuitable fasteners or accessories					X	X				25	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.25	Collision of several machines					X	X				25	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.26	Derailment					X	X				25	M	Proper staff training and healthy reminders, protocols followed				X						X		
10.27	Working at height				X			X			50	M	Proper staff training and healthy reminders, protocols followed				X						X		
11	**Risks due to noise**																								
11.1	Hearing loss, other physiological restrictions (i.e. loss of equilibrium, reduction of concentration)				X			X			50	M	Health and safety protocols followed				X						X		
11.2	Damage to verbal communication, damage to acoustic signals, etc.				X			X			50	M	Operating and maintenance instructions incl. regular check				X						X		
12	**Customer risks**																								
12.1	Credit risk	X							X		40	M	Security protocols in place to prevent fraud, prepaid and deposit requirements where possible/available		X									X	
12.2	Customer fraud	X						X			100	H	Security protocols in place to prevent fraud		X									X	Customers engaging in fraudulent activity
12.3	Cancelled services and product returns	X							X		40	M	Customer satisfaction reports and feedback		X									X	
12.4	Customer disputes		X						X		30	M	Monitoring of customer feedback reports and prompt recoveries		X									X	Customer disputes draining resources
12.5	Reputation risks	X						X			100	H	Monitoring of customer feedback reports and prompt recoveries		X									X	Reputation damage caused by customers' actions
12.6	Concentration dependency		X							X	3	L	Expanding offerings for a variety of demographics		X									X	Over-dependance on a single demographic
12.7	Liability risk		X							X	3	L	Proper staff training and healthy reminders, protocols followed		X									X	
12.8	Operation risks				X					X	2	L	Proper staff training and healthy reminders, protocols followed		X									X	
12.9	Ethical risks				X				X		20	M	Proper staff training and healthy reminders, protocols followed		X									X	
12.10	Compliance risks				X			X			50	M	Security protocols in place to prevent fraud		X									X	Compliance violations related to the customer
13	**Risks due to crowding and guest flow**																								
13.1	Surging and swaying leading to crushing between people and against fixed structures				X			X			50	M	Staff training to help crowd control and gust flow				X						X		
13.2	Falling and being trampled underfoot				X			X			50	M	Staff training to help crowd control and gust flow				X						X		
13.3	Lack of suitable entrances and exits						X		X		10	L	Consideration of codes, staff training				X						X		
13.4	Stalls and concessions obstructing crowd movement and leading to congestion at entrances and exits during busy periods	X							X		40	M	Staff training to help crowd control and gust flow				X						X		
13.5	Inadequate site design, leading to crossflow				X				X		20	M	Consideration of codes, staff training				X						X		
13.6	Children lost or separated from group	X							X		40	M	Security surveillance, security monitoring		X									X	
13.7	Bottlenecks with evacuation	X						X			100	H	Staff evacuation and safety training, regular drills				X						X		
13.8	Stalls and concessions obstructing crowd movement at photo ops	X								X	4	L	Staff training to help crowd control and gust flow				X						X

Cloud Town

Attraction:	Cloud Town	**Date:**	11.24.23
Location/Area:	A Land w/in an Existing Theme Park	**Revision:**	18

Story:

Cloud Town is a community that exists in no specific time or place. Its residents, called Dream Weavers, traverse the universe in hot air balloons to procure objects, collect stories, and gather inspiration. Their town serves as a repository of "all things good". These provisions are shared among the community and taken along on journeys as the Dream Weavers build the dreams of people all over the universe. Each person, animal, and creature has their own cloud in the sky - this is where their individual dreams are stored. These clouds hold all the inspiration for each individual being, so that they can construct their own dreams while they sleep. The Dream Weavers have one goal: to inspire dreamers of all ages to dream of a brighter, happier, future.

Today, there are more dreamers and visionaries than ever! While this is a good problem to have, the Dream Weavers now find it difficult to keep close tabs on all of their constituents. Because of this, the town is recruiting new members of their team, including part-time and seasonal positions as well! Visitors to Cloud Town are encouraged to explore the community and learn about this very important profession.

Project Goals:

Design a land, connected to Orlando Theme Parks that provides guests a break from crowds, a relaxing and fun atmosphere, and a way to stay cool. Although there are spots that are less busy in Orlando based theme parks, there are no dedicated lands that focus on low sensory activities that are mindfully created with guests in mind who are sensitive to sensory overload.

Project Description:

Cloud Town – An inclusive, accessible, inspirational theme park land focused on relaxation and recovery.

Cloud Town

Exordia Park Fountain

Attraction:	Exordia Park Fountain	**Date:**	11.24.23
Location/Area:	Center of Town Square	**Revision:**	18

Description: A grand fountain can be seen in the central hub at the front of the land. The fountain is made of a large cast stone basin with bronze accents. A thick cloud of mist flows from the center of the fountain where a large bronze statue of a hot air balloon appears to be floating among the clouds. The hot air balloon itself is made of many individual patches that depict objects collected from the first ever Dream Weaver, Exordia.	Project Goals: Provide a central point in the middle of the Town Square that gives off a fresh misty breeze Project Description: This is a water fountain shaped like a hot air balloon meant to bring people in the town together to commemorate the Dream Weavers' first trip into the sky.

Statue Requirements:	Type:	Water Fountain
	Potential Manufacturer(s):	Internal SPFX Team, WET, or Show Set
Facility/Ride/Interface Requirements:	Plumbing and other supporting structure	
Landscaping/Hardscape:	Mosaic tiles sitting atop the regular hardscape of the town	

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. This narrative is intended to illustrate a conceptual approach only and is not to be constructed. Cloud Town Trek

Attraction:	Cloud Town Trek	**Date:**	11.24.23
Location/Area:	Around the Whole Town	**Revision:**	18

Description:

Curious visitors board their very own cloud vehicle and traverse through the quaint community to experience all there is to do and see. Elevated above the town and narrated by Brawner, the trek engineer, this tour provides Guests with the history, traditions, and future plans for Cloud Town.

Since inclusivity, accessibility, and inspiration are the tenets of the town, many features have been included to ensure that all Guests can participate. Wheelchairs can be installed directly into the cloud vehicle for a smooth ride – no need to transfer!

Project Goals:

Transport guests throughout Cloud Town w/ story narration; provide a breezy space to cool down

Project Description:

Providing a space for guests to slow down and enjoy a ride over above Cloud Town, Cloud Town Trek is the perfect out-door ride system to catch the breeze, cool down, and learn the story of the land.

Ride System Requirements:		
	Type:	C-Ticket Peoplemover Attraction
	Vehicle Capacity:	20 for Standard Train, 22 for Wheelchair Accessible Trains
	THRC:	1734 per Hour
	Dispatch Interval:	53 Seconds for Standard Trains, 3.5 Minutes for Wheelchair Accessible Trains
	Track Length:	7 minutes

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. This narrative is intended to illustrate a conceptual approach only and is not to be constructed. Disclosure of any contents contained herein represent a breach of confidentiality and will be prosecuted to the fullest extent of the law.

	Potential Manufacturer(s):	Dynamic Attractions, Garmendale
Facility/Ride/Interface Requirements:	Facility structure needed around ride system including support columns; ride system required w/ special requirements for wheelchair accessibility (non-transfer); elevator/stairs needed to get to load/unload platform	
Landscaping/Hardscape:	N/A	

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. Discovery Dreamlanding

Attraction:	Discovery Dreamlanding	**Date:**	11.24.23
Location/Area:	Weenie of Dream Weavers' Cloud Town	**Revision:**	18

Description:

The Dream Weavers have pulled a few dream clouds to the ground for all to experience and explore. For the very first time, visitors of Cloud Town can get a glimpse into what it's like to be a Dream Weaver. Guests are invited to step into the dream clouds and explore three different dreams through interactive walking trails filled with storytelling, excitement, and wonder.

Project Goals:

Allow guests the freedom to explore different trails that are not too thrilling but provide an escape; this would replace the need for an E-Ticket attraction.

Project Description:

Guests needs a space to be able to walk around and interact with their surroundings, especially helping them learn stories of the Dream Weavers. This space tells three different stories of things that the Dream Weavers may find when they go into the clouds. In fact, this is a cloud they have brought down for guests to be able to explore what might be above.

There are three trail lengths to choose from (8 minutes, 10 minutes, and 12 minutes) to allow guests a bit of flexibility and variety.

Attraction Requirements:

Type:	Walking Trails
Guest Capacity:	2, 255 (45 sqft per person – indoor); Circus: 339, Forest: 564, Lagoon: 1,083, Airlock - 269
Square Footage:	Building: 145,125 sqft Airlock - 12,125 sqft Circus: 15,253.25 sqft Forest: 25,375 sqft Lagoon: 48,750 Total Onstage: 101,503.25 sqft BOH: 43,621.75 SQFT

Discovery Dreamlanding

Cloud Town

Attraction:	Discovery Dreamlanding	**Date:**	11.24.23
Location/Area:	Weenie of Dream Weavers' Cloud Town	**Revision:**	18

Scene/Area: 01: The Enchanted Forest (13 Minutes – 10 Minute Trail with 3 Minute Buffer)

Description:	This is a quiet walking getaway for guests to see what the Dream Weavers might see when they go into the sky and see all of the things people have been dreaming, especially when related to an Enchanted Forest
Facility/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility;
Landscaping/Hardscape:	Foliage on the walking path; soft grass on the floor that glows w/ SPFX
Animated Figures (FA):	N/A
Animated Props (AP):	Opening and closing flowers throughout the land; small gnomes and fairies that are animated props guiding guests through the space
Artificial Foliage (AF):	Foliage surrounding the entire scene; foliage needed to guard animated fig props from guests
Audio Hardware (AH):	Speakers overhead, on the ground, shrouded by show set
Audio Software (AFX):	Minimal, classical music that is very low but supports the story of an enchanted forest

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. This narrative is intended to illustrate a conceptual approach only and is not to be constructed. Disclosure of any contents contained herein represent a breach of confidentiality and will be prosecuted to the fullest extent of the law.

Graphics & Signage (GFX):	Operational and directional signage; story graphics for the space
Media Software (VFX):	Possible media for projection in certain small elements of the land
Mockups:	Mock-up the entire walking trail for a play-test
Projection Equipment (VHX):	Projectors for possible projection in the scene
Rockwork (RW):	Some rockwork for the trail to support overall enchanted forest story
Scenic Paint (SP):	Scenic paint on show set and throughout the entire trail; touch-up-and tie-in as well; UV lighting paint
Show Action Equipment (SAE):	N/A
Show Controls (SC):	With animated props, will need Show Control; Lights on/off, music on/off controls, overall power controls
Show Lighting (SL):	Lights focused on show set and prop elements and supporting overall trail; Enchanted Forest themed lighting; lighting to brighten the darkness since this will be a nighttime trail
Show Props & Dressings (SPAD):	Variety of props to sit on larger Show Set items, especially to enforce the story of the creatures who live in this trail
Show Sets (SS):	Giant mushrooms and overgrown elements; larger than what would be seen in real life; large vines and tree trunks; big leaf canopies;
Special Effects (FX):	Stars throughout the space and all over the ceiling and walls; help lead you through the trail; possible glowing floor; rain-like effect to give the feeling of light rain/drizzle in the area without actually raining

Cloud Town Clubhouse and Dreamscape Estates

Attraction:	Cloud Town Clubhouse and Dreamscape Estates	**Date:**	11.24.23
Location/Area:	The Left Outskirt of Town	**Revision:**	18

Description:

Located just outside the bustling downtown community, the Clubhouse sits at the entrance to Dreamscape Estates, the premier neighborhood that houses the Dream Weavers. Guests are welcomed inside the Clubhouse which serves as a community space, ideal for visitors who need to take a rest and relax. If a private room is needed, Guests can meet with a Clubhouse Cast Member to reserve one of the homes in the neighborhood for a safe, quiet, private, and sensory friendly escape. The Clubhouse features a curved roof and a large rainbow/cloud stained-glass window at the front. When the sun shines at just the right angle, the interior of the space is filled with rainbows of light.

Stepping through the clubhouse, Guests enter the neighborhood of Dreamscape Estates. This neighborhood is filled with the vibrant and quirky homes where the Dream Weavers reside. Each house is bursting with unique personality and unusual features, like curved rooflines, goofy silhouettes, and bright colors. Reserved specifically for one group of guests, each house serves as a dedicated space to relax, cool down, and unwind.

Project Goals:

Provide a space for guests to find a community quiet space along with individual quiet rooms in the shapes of houses

Project Description:

A key design component to this land includes this clubhouse and these neighborhood houses since they provide escape for anyone experience overstimulation or the need to cool-down.

Star Tree Academy

Cloud Town

Attraction:	Star Tree Academy	**Date:**	11.24.23
Location/Area:	The Right Outskirt of Town	**Revision:**	18

Description:	
During the school's annual open house, Guests are invited to play and explore the school grounds. Entering through a large schoolhouse facade, the restrooms and changing rooms provide a location for families to prepare for the fun that is in store. An Ornamental metal fence with hidden star details runs along the outside border of the academy. A one-of-a-kind recess playground and splash pad offers younger Guests the opportunity to play and explore. Stepping further into the schoolyard, a large tree appears with glowing stars emanating from the branches. The namesake of the school, the Star Tree serves as a spot for Guests to make wishes for a brighter future. As each wish is made, a corresponding star begins to glow on the tree.	Project Goals: Create an area for guests to play and interact Project Description: There is a schoolhouse façade that leads into a room with restrooms/ changing rooms to allow guests to continue into a recess-like area with a playground, a splash pad, a garden, and a large Star Tree at the rear

Building/Offering Requirements:		
	Type:	Restrooms/Changing Areas, Garden Playground/Splash Pad
	Guest Capacity:	Indoor 82 (45 sqft per person); Outdoor: 54 (135 sqft per person)
	Square Footage:	Outdoor Space: 7350 sqft outdoors; Conditioned Space: 3675 sqft

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. This narrative is intended to illustrate a conceptual approach only and is not to be constructed. Disclosure of any contents contained herein represent a breach of confidentiality and will be prosecuted to the fullest extent of the law.

Facility/Ride/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility; Paint Base Scope provided by Facility; Playground and Splash Pad mechanisms to be provided by Facility and Ride
Landscaping/Hardscape:	The Recess area will be a concrete hardscape similar to what would be found behind a school; the garden playground will be completely made out of grass "hardscape"; Light foliage to be in the recess area but extreme foliage in the garden

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. Pilot's Post House

Attraction:	Pilot's Post House	**Date:**	11.24.23
Location/Area:	Main Street of Cloud Town	**Revision:**	18

Description: An arched Quonset hut reminiscent of an airplane hangar is adorned with signage and graphics that depict mail delivery. A post office collection box is placed outside with hand painted lettering. Inside the hangar, the arched ceiling stretches the length of the space. Located next to the Inspiration Vault, the two spaces connect to allow for package drop-off upon purchase. The rear of the building contains a small stage and open floor for a story time entertainment act.	Project Goals: Offer a space for package pickup and drop off as well as a children activity center with an entertainment offering Project Description: This is a space to serve the logistical need for retail checkout and package pick up, but it also allows children an area to write some letters to the Dream Weavers and to meet the Dream Weaver Pilot himself!

Building/Offering Requirements:	Type:	Package pick-up and Drop-Off/ Entertainment Offering
	Guest Capacity:	66 (indoor – 45 sqft a person)
	Square Footage:	Conditioned Space Combined for Pilot's Post House and The Inspiration Vault: 18,793 sqft; Guest Space for Pilot's Post House: 2,948 sqft
Facility/Ride/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility; Base paint scope provided by facility

Pilot's Post House

Cloud Town

Attraction:	Pilot's Post House	**Date:**	11.24.23
Location/Area:	Main Street of Cloud Town	**Revision:**	18

Scene/Area: Pilot's Post House

Description:	Pilot's Post House is a place that allows for package pickup and drop off; it also provides an area for kids to write letters to the Dream Weavers to give to Pilot to deliver; entertainment offering w/ a few specialty retail items
Facility/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility; Base paint scope to be provided by facility
Landscaping/Hardscape:	N/A
Animated Figures (FA):	N/A
Animated Props (AP):	N/A
Artificial Foliage (AF):	N/A
Audio Hardware (AH):	Overhead speakers throughout the space for low background music ; speakers for Pilot's microphone and media during his entertainment appearance
Audio Software (AFX):	Low, soft background music to play through a variety of speakers; any supporting sounds for Pilot's entertainment appearance

© The Dream Weavers. The information contained in this document is intended for educational purposes with no claim to rights of ownership. This narrative is intended to illustrate a conceptual approach only and is not to be constructed. Disclosure of any contents contained herein represent a breach of confidentiality and will be prosecuted to the fullest extent of the law.

Graphics & Signage (GFX):	Directional and operational signage; minimal retail signage; large post cards and letter graphics throughout the space
Media Software (VFX):	Any media to support Pilot's Performance
Mockups:	N/A
Projection Equipment (VHX):	Any projection to support Pilot's performance
Rockwork (RW):	N/A
Scenic Paint (SP):	Scenic paint throughout the entire space for emphasizing the theme of the Cloud Town post office
Show Action Equipment (SAE):	N/A
Show Controls (SC):	Lights on/off, music on/off controls, overall power controls, on and off of animated props
Show Lighting (SL):	Lights to emphasize any props, show set, and merchandise/retail; SL for the entertainment offering
Show Props & Dressings (SPAD):	A large variety of props supporting the post office story; props for Pilot's entertainment appearance;
Show Sets (SS):	Show Set parts that support the overall story; Entertainment stages and scenery for Pilot's entertainment appearance; Hanging paper airplanes and letters
FF&E	POS/cash wrap

The Inspiration Vault

Attraction:	The Inspiration Vault	**Date:**	11.24.23
Location/Area:	Main Street of Cloud Town	**Revision:**	18

Description: Located in the town bank, Guests commemorate their journey to Cloud Town by shopping among the Dream Weaver's collection of feel-good finds. Dark wood-stained bank teller desks with green banker lamps act as check-out counters. Passing through a large bank vault, marble floors and metal walls are covered with shelves of fun toys and gifts that create boundless amounts of dream inspiration and creativity.	Project Goals: Generate profit by providing retail that is themed to the land while giving plenty of space to avoid overstimulation Project Description: A huge way to gain profit in this land is through this store that is themed after a bank.

Building/Offering Requirements:	Type:	Retail Store
	Guest Capacity:	174 (indoor – 45 sqft a person)
	Square Footage:	Conditioned Space Combined for Pilot's Post House and The Inspiration Vault: 18,793 sqft; Guest Space for The Inspiration Vault: 7,829 sqft
Facility/Ride/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility; Base paint scope provided by facility	
Landscaping/Hardscape:	N/A

Folio's Bookshop

Cloud Town

Attraction:	Folio's Bookshop	**Date:**	11.24.23
Location/Area:	Main Street of Cloud Town	**Revision:**	18

Description: Branching off the café, this separate section contains books for purchase and a limited menu of coffee and tea. The front of the store is open to both levels and shows massive floor-to-ceiling bookshelves with a balcony overhead. Sleeping kittens are dreaming among the books, tails wagging overhead. A curved staircase leads to the second level of the shop, which is intended for adults, featuring individual desks for personal work. The ceiling mural matches the hand painted style seen throughout the town and depicts the different dreams of kittens.	Project Goals: Provide a safe, quiet space where guests can lounge in a quiet setting surrounded by books Project Description: A Bookshop w/ tables and chairs filling the lower level of the shop as bookshelves line the walls. A rotunda with mosaic tiles depicting cats opens to the second floor balconies where bookshelves continue to line the walls. On the second level, guests will find a lounge area.

Building/Offering Requirements:	Type:	Bookshop
	Guest Capacity:	90 (Indoor – 45 sqft per person)
	Square Footage:	Combined Conditioned Space for Folio's Bookshop and Folio's Quiet Kitty Café: 14,161 sqft; Folio's Bookshop Guest Space: 4,078 sqft
Facility/Ride/Interface Requirements:	Building Structure to be built by Facility; Exit Signs, Fire Considerations, Work Lights, and Electrical to be provided by Facility; Several different lowered spaces for library nooks provided by Facility

Folio's Quiet Kitty Café

Attraction:	Folio's Quiet Kitty Café	**Date:**	11.24.23
Location/Area:	Main Street of Cloud Town	**Revision:**	18

Description:

Prior to his retirement, Folio was the Dream Weaver responsible for maintaining the dream clouds of the felines of the world. He discovered that they shared his passions of sleeping, storytelling, and snacking. Now retired, Folio lives a very relaxed life and manages his shop where Dream Weavers and visitors alike can relax and explore his book collection, grab a quick meal, and watch his kittens dream of their next big adventure. Visitors of Cloud Town are encouraged to purchase a book for their travel home.

Kittens (limited figure animation) sleep among the tall bookshelves. Tables and chairs fill the lower level of the shop as bookshelves line the walls. A dome ceiling with stained-glass mosaic tiles depicts sleeping cats. Portraits on the walls depict cats in dream-like situations as if Guests are looking into their dream clouds.
A separate dining room depicts contents from the kitty dream clouds where objects are scattered throughout including mountains of yarn balls, toy mice and fish, and large scratching posts.

Project Goals:

Provide a safe, quiet space where guests can grab some food from the cafe

Project Description:

A cafe serving coffee, pastries, and small bites among a quiet atmosphere. Kittens (limited figure animation) sleep throughout the room. Tables and chairs fill the lower level of the café themed all around Folio's cats.

GROUP

Cloud Town: A Theme Park Land of Relaxation and Escape

Market Relevance and Research

Why?

In *The Immersive Worlds Handbook*, Lukas notes that immersive experiences are "places where people relate to one another, in which they develop their sense of who they are and how they connect with the world, and in which new and creative ideas can emerge into their minds" (2019, p.151). Typical theme parks can be overwhelming and overstimulating, especially for individuals living with mental health challenges or those who are differently abled; it can be overstimulating and stressful. Additionally, elements of weather and natural environment can have a huge impact on the ability and willingness of many to travel (Pandey, 2023). This project seeks to solve this problem and create a more inclusive space for all. Many guests become dissatisfied with the "hustle and bustle" of current theme parks and should be able to escape into a themed land that is just as exciting as the rest of the park while also providing a "cool-down" space that meets a variety of guests needs.

Lukas (2019) discusses using an "insider's view" when developing an immersive space: "Focus on all possible variations of a guest's mood as the person encounters a space… Consider ways in which a space may adapt to all the possible uses of the guest… Guests bring unique needs to a space" (p.152). He goes on to explain that demographic factors, including ethnicity, cultural background, disability status, and different beliefs, should be factored into the design of themed spaces. There are varied levels of accommodation required by guests to experience attractions and Lukas (2019) explains that "guests with disabilities deserve the same treatment as other Guests" (p.153). The need for an inclusive space for theme park guests to rest and take a

break -- while still being immersed in the incredible storytelling environment that can only be found in themed entertainment spaces -- is underutilized by theme parks and is not an integral part of the theme park design process. After all, theme parks and themed immersive spaces are "spaces of possibility, transformation, and excitement. Creating a space that guests truly love is a human act - one that can change the lives of guests (and workers) in dramatic ways" (Lukas, 2019, p.151).

Target Audience

The target audience includes individuals who get easily overwhelmed at theme parks and those who commonly experience overstimulation, which accounts for approximately 21% of our population. According to the CDC (2023), 20% of the population suffers from mental illness, and 1% of the population suffers from ASD (autism spectrum disorder); both groups could be key individuals attending this theme park land. Furthermore, most of our target audience ends up falling under the category of families with children.

Theme parks can provide relaxation for some, or overstimulation and panic for others. According to Wheeler (2023), populations that suffer from sensory overload include individuals with attention deficit hyperactivity disorder (ADHD), ASD, sensory processing disorder, psychotic disorders, anxiety and depression, and post-traumatic stress disorder (PTSD). Wheeler (2023) also lists triggers for sensory overload, which include loud noises or music, crowded spaces, emotionally intense people or groups, drastic environmental changes (temperature, light, etc.), unexpected physical contact, heavy traffic, tactile triggers, intense smells. Theme parks commonly contain a lot of these triggers and can be overwhelming and overstimulating. In addition, parks like Walt Disney World (WDW) rely heavily on planning ahead (reservations,

virtual queues, etc.), which can make many missed opportunities for guests who may not have done so and can also be a stressful experience for those who are not typically "planners" (Dumas, 2023). Improving the guest experience by including an area designated to combat some of these issues can allow for a huge demographic of guests, who might avoid theme parks for these reasons, to have more freedom to explore theme parks.

Where? (And Why There?)

This sensory-friendly, cool-down land would best be constructed inside of a larger theme park, that is overall filled with bustle and thrill. This would underscore the dichotomy of the lands and emphasize the need for a properly themed zone dedicated to resolving overstimulation and relaxation. Places like Walt Disney World and Universal can be so overwhelming and it is a major turn-off to patrons with sensory processing complications (Destinology, 2022). Some theme parks, including Dollywood Parks and Resorts, have started to incorporate "quiet down" areas, aimed at relaxing children (Levine, 2017), which is a step in the right direction. However, catering specifically to children alienates a lot of adults that may need a break, as well. Larger theme parks could benefit from the incorporation of these spaces in a way that is well-themed and more fully inclusive. Aside from addressing sensory overstimulation related to bright lights, and noise, this land could also offer generous creature comforts like seating and shade. Even guests who do not typically get overstimulated can still get exhausted by lack of cooling and rest options as they go through existing themed environments. Within a land aimed to comfort, we can offer a nice rest to these guests, as well. Constructing our land in Orlando, Florida allows us to solve problems that are incredibly prevalent to the region and allows us to compare our solutions with versions of them that might already be in place.

Return on Investment (ROI)

Predicting the Return on Investment of a new theme park land can be a little tricky, but according to *How Much Money Can a Theme Park Really Make? Answering the Top 7 FAQs* (n.d.), the industry standard assumes that within the first five to ten years of the land being open, there should be about an 8-10% ROI. The ROI can be predicted with the following formula provided by Gillis (2021):

Predicted ROI = (Predicted Net Income / Cost of Investment) x 100

Therefore, 8-10% of an investment of $580,207,008, which results in an ROI roughly between $45 million and $60 million, within 5 to 10 years is the current goal of this theme park land.

What?

As theme parks have gained popularity in the American market over the past 65+ years, one common observation is that the experience can become formulaic. Former Walt Disney Imagineer, Eddie Sotto, explains that theme parks "perpetuate the same format over and over… The queue, the preshow, ride, post-show, and gift shop with the 'I survived' franchise merchandise. Do that six times and you wonder why you came" (Younger, 2014, p.149). This experience should not fit the standard formula. Instead, it should utilize unique concepts, attraction types, and storytelling methods to deliver a brand-new experience to guests.

This project plans to focus on the inclusion of a relaxation area for guests to take breaks from the typical high-energy experiences of theme parks. What will make this experience unique is the inclusion of these slower-paced offerings that fit in with the overall land story developed for the project. The area is to be riddled with interactives that enhance the experience, but do not take away from the experience for guests who choose not to engage with them. Typically found

in queues, interactives will be sensory friendly and be spread throughout the land for moments of discovery (Younger, 2014, p. 362).

The land layout could utilize plaza design to have a central hub of the land with multiple separate areas for guests to explore (p. 295). Some of these could be mystery routes where a guest must explore to determine the destination (p.298). This allows for moments of discovery and less foot traffic for quieter pathways within the land. Along with a captivating story to establish the world guests' experience in this area, land conflict can also be used to add dynamics to the space. Land conflict is described as “the purposeful situation of a land on a boundary, with two competing forces at odds” (p. 97).

Regarding the ride systems in place for this proposed theme park land, story-driven design will be utilized to determine the proper ride systems which will be utilized for the project (p. 417). The intention is to create a ride similar to the People Mover at Magic Kingdom, where guests may travel around the theme park land above the ground in order to get the perfect view of the land below. This land also plans to utilize alternative attractions and show attractions like exhibits, gardens, playgrounds, walkthroughs, and character experiences to offer a well-rounded experience (p. 418). An example of this is a large show building full of three different walking trails for guests to explore!

This land will also feature retail shops, a quick-service dining location, food carts/outdoor vending, and will feature a “cult food”. Having a cult food in the land provides exclusivity and leads to higher sales (p. 356).

Duration of Experience

A WDW representative noted that for first-time guests, one day per park should be allocated to experience most everything (Thaiana, 2020). Within a park like Magic Kingdom,

which contains seven themed lands, the average amount of guest visitation is between one to two hours per land if the park is open 9:00 am until 10:00 pm ("Touring Plans," n.d.).

One to two hours would be the ideal amount of time that guests would spend in this land to ensure they experience everything it has to offer. Including attractions, retail, food and beverage, relaxation spaces, interactives, and exploration of the story area, this would be sufficient to see and do everything. Of course, additional time could be enjoyed in the space to the guest's preference.

Area/Architecture/Special Requirements

Architecture Promoting Shade, Cooling Down, and Relaxation

There are many ways that architects use structures to create shade and block the sun to create a space for people to escape the harmful heat and UV rays. These structures can be themed in endless ways and be constructed out of a large variety of materials to match with any project, in any climate. Landscape architects also do this, but with the plants in their landscapes. These plants could not only block the sun, but also add to the environment with fresh oxygen, cooling the surrounding areas.

From glass panels that are connected to sensors that limit the amount of light that is let through the panel, to design styles that are created in a way to limit the light rays, there are several examples of smart shade control architecture design which implement both new technology and electronics. One possible design that could help with shade creation is called "Twisty," which won a competition called the "Future of Shade" in 2013 (Price-Robinson, 2016). According to Price-Robinson (2016), this invention is an "innovative and flexible cooling system" that could be a design type included in this theme park. Furthermore, for many of the

proposed architecture in this land, softer materials that are not conductive should be further researched for implementation, especially in extremely hot climates, such as the south. Materials that could benefit such climates are natural materials such as vegetation, wood, or fabric. These materials are not conductive or absorb heat such as metal or concrete.

Additionally, for the space to also create its own energy and be sustainable, solar panels could be mounted on top of the shading devices. This could reduce energy costs and reduce the return on advancement length of time. More things that could be added to the space to help cool down the guests and the area are water effects and elements. Splash areas for kids have been used in many parks around the world for their entertainment purposes for kids but also cools them down in extreme heat (Madson, 2023). These principles could be implemented in other ways to be used by not only adults but also those with disabilities to be inclusive to a wider audience.

Vegetation and water effects, such as reflecting ponds, along with easily accessible pathways will be beneficial when promoting a landscape of relaxation. Pathways that wind around and have plenty of spots for seating are essential, especially with secluded areas for groups to relax. These paths would need plenty of shade by either trees or an architectural element. Sounds of running water enhance the relaxation atmosphere and a water feature could be added into the structure.

Architecture Emphasizing Inclusion of People of All Abilities

A huge focus of this project is to create an environment that not only meets ADA standards but exceeds them. A massive undertaking for this project will be understanding all the different standards that should be met, exceeded, or created for our guests of every ability,

whether a physical or a mental one. We believe that accessibility accommodations should be built into experiences so that individuals who are differently abled can still experience story and theming in the same way and in a more convenient way.

Investment Range

Based on a variety of research initiatives, the overall investment range can be broken down as follows:

TOTAL: $580,207,008

Soft Costs: $66,138,460

Facility/AD: $218,715,990

Show: $131,376,065

Ride: $55,482,500

Demo: $47,171,301

Capital Allocation: $14,151,390

Contingency: $47,171,301

How?

Implementation Strategy

The project aims to create a sensory-friendly land that can coexist within theme parks around the globe, providing inclusion and accommodations for neurodiverse individuals, and families who require an idyllic setting away from the stresses that theme parks can bring. The design prioritizes reducing sensory overload and creating an inviting atmosphere.

Creative & Project Team

To effectively undertake a project of this magnitude, it is imperative to have a creative director who will oversee the project's creative vision, theme development, and artistic direction.

Additionally, a show producer is required to bring the project to life by coordinating various aspects of production and timelines. Artists are needed to create visual elements such as concept art, sculptures, and thematic designs that align with the sensory-friendly theme. Architects play a crucial role in designing the layout, pathways, structures, and infrastructure of the sensory-friendly land, ensuring accessibility, and considering sensory factors. Graphic designers are responsible for developing visual materials, signage, and graphics for the sensory-friendly space, ensuring clarity and inclusivity in communication. Lastly, show writers are essential in crafting narratives and content for sensory-friendly shows, exhibits, and educational materials that focus on storytelling to promote understanding and awareness. The project manager is responsible for overseeing the project's implementation, which includes establishing a timeline, allocating resources, and coordinating with stakeholders. An estimator plays a vital role in facilitating the budgeting process, as they are responsible for estimating material and labor costs. Moreover, their participation guarantees the maintenance of financial control throughout the duration of the undertaking. Collectively, a planner can be advantageous for all individuals to develop a comprehensive plan and timetable to efficiently manage the project's activities, milestones, and deadlines, thereby fostering optimal progress.

For the purposes of this project, here is the breakdown of the team members that will be implementing this theme park land:

- Gabbi Hanes - Project Manager
- Samuel Fisher - Creative Director
- Corey Clancy - Show Producer
- Charlie Suhling - Show Writer
- Mary Levinsky - Art Director and Accessibility Resource

- Courtney Metzger - Graphics and Ride Development
- Hannah Fajnor - Architect and Storyboard Artist
- Shelby Boyd - Visual Artist and Story Development

Inclusivity & Expertise

We believe it is essential to consult neurodiversity and inclusivity specialists who can advise on how to create a welcoming environment for individuals who are neurodiverse. They can contribute to collaborative sensory-friendly design and educational-program development. ADA specialists can help ensure full compliance with the Americans with Disabilities Act (ADA) and related accessibility standards, particularly regarding infrastructure and facilities, as well as how to exceed our visitors' expectations. Diversity and inclusion advisors will provide guidance on how to represent diverse communities in the design and programming of the themed land. With the inclusion of these professionals, our team will possess the necessary resources to do the research required for the establishment of a serene environment where all visitors can experience a sense of ease and inclusivity while seeking a vacation from their vacation.

Design & Development Approach

In our endeavor to create a sensory-friendly land, we are taking a creative and considerate approach that includes original designs that are tailored to the sensory-friendly theme and inclusivity goals, such as gentle color palettes, a cozy theme, and characters to befriend along the way. First, we are assembling a team of artists, architects, writers, and specialists who know how to make everyone feel welcome, including those with sensory challenges. This means that we will not use pre-made designs; everything we create will be unique and special. We will ensure that our vision is reflected in the design of those portions of the project that involve the use of products that contribute to the space's serenity and warmth. We have conducted extensive

research and are willing to experiment with new ideas if we believe they will improve our endeavor. Overall, we are being inventive, constructing items from scratch, and collaborating to ensure that our sensory-friendly land is a delightful and welcoming place for all to enjoy.

Funding

For this initiative, there are several sponsors that are being considered, including health and wellness brands such as Advent Health, the Calm App, and Headspace. To elaborate, the Calm App is the "#1 app for sleep, meditation, and relaxation" ("About," n.d.). This would be the perfect sponsor for this theme park land due to one of the biggest drivers for the land is a need for a space for relaxation. Similarly, the Headspace app "provide[s] mindfulness tools for everyday life, including meditations, sleepcasts, mindful movement and focus exercises" ("About Us," n.d.). Furthermore, it would also be beneficial to reach out for sponsorship opportunities with businesses, non-profits, and universities with similar missions to this theme park land. Generally, though, since this land is going to be implemented into a pre-existing theme park, it can be assumed that the theme park will have funds set aside for development of new projects, allowing a dip into these funds to create this land!

Risk Analysis

While there are many possible hazards that can be identified throughout the development of a theme park land, we are in the initial phase of our idea and many of our risks lie within our overall idea and theming. When discussing our ideas for this project, there are a couple of predominant risks that we must address, to best find a solution to our idea.

Crowd Control and Guest Flow

Crowds in theme parks are a huge concern and can be a direct cause for many different stressors, including anxiety, over-stimulation, and even difficulty for those with physical restrictions to be able to navigate the park. According to Eatough (2021), the most common causes of sensory overload are bright lights, loud noises, certain textures, and crowded spaces. You will note that the first three of those things can be controlled in the original design of our land, but the fourth is something that will have to be an ongoing effort. Creating something that will solve such a huge and prominent problem could undoubtedly make it a very popular experience inside of a theme park. Additionally, there may be certain conditions that draw even more crowds into our area (and cause them to stay for more extended periods of time), such as poor weather. Although it is a positive thing to create a space that can be beneficial for so many people, this can also present a new set of challenges. The overcrowding of the area can effectively erase the purpose of the land for many people.

There will have to be measures in place to combat this challenge. Ideas such as virtual queues and capacity limits are initially brought up but present their own problems, as well. Virtual queues are a popular option for attractions that may draw in huge crowds (Attractions.io blog, 2021) but the prominent use of technology for planning an entire day at a theme park is not something that has been without its critics. Some people think that these technologies make their day less fun, and the constant phone time is too stressful (Dumas, 2023). Time caps, capacity limits, etc. run the risk of making the services unavailable to someone who may need them at a time that is most important. This is the biggest conflict that will have to be developed and addressed throughout the development of our project.

The Element of Thrill

There are many different elements that come together to make a successful theme park; guests can have an array of feelings, emotions, and experiences throughout their visit. According to Ryan et al. (2010), "[t]he main sources of satisfaction appear to be those associated with the atmosphere of the park, the existence of thrill rides, degrees of crowding experienced, having places to rest and a perceived reasonable entry price." While we can hit the mark on most of those points, the existence of thrill rides will be the most challenging. Thrill rides are more likely to present the former challenge discussed: overcrowding. They also can inherently present more stressors, such as their size and noise-level. However, they also can be beneficial in many ways; they contribute immensely to the overall success of a land. According to Stephens (2018), they can also contribute positively to someone's mental state. Our land should include elements of thrill, but will have to do so tastefully, as to not bring in the normal stressors of a theme park. We will also use theming and storytelling to add more unique elements of thrill and discovery, which will draw in guests to visit our land who might initially count it out due to a perceived lack of thrill. This combination of both thrill/excitement *and* relaxation/cool-down will be a unique draw to our land that cannot be found in other themed spaces.

Profitability

Finally, for all the elements that we want to include in our land, we still must turn a profit in some way. There are many ways to do this within an entire theme park, but for this specific land, which is focused around providing services to people, we want to be tasteful about which experiences require the guest to pay extra. According to White (2023), money has a direct impact on peoples' stress levels. And some feel that theme parks are quick to "nickel-and-dime" them every step of the way. The constant extra charges and enhancements, along with the reduction of

"free" services has tended to affect the reputation of major theme parks, including Walt Disney World (Oliveros, 2023). It will be important for us to find a way to make a profit and mitigate the costs of all the features we want in our project, without making the land inaccessible to certain demographics of visitors.

Possible Themes

The following three themes have all been addressed in order to create the theme for the theme park land being created: Cloud Town.

Theme 1: Cartoon neighborhood akin to Animal Crossing. A space with delicate pastels and a small-town/neighborhood feels.

Theme 2: A land that is soft and whimsical, enrobed in clouds.

Theme 3: A natural feel. Garden or woodland dreamland. Full of plants; earthy and ethereal.
